## World Mining

OCTOBER 1983

Desing Considerations H.E. Griesshaber of Bechtel Civil and Minerals Inc. reports	41	cf fine crushing with a large discharge setting	
Selecting Equipment Precise research on ore must be completed. Rune Rolfsson of the Evedala-Arbrå Research Laboratory explains	45	Cylpebs : An Alternative Grinding Media Ulrich Cloos Doering GmbH describes this unusually-shaped product	59
Evolution of a Two-Stage Autogenous Circuit Over a period of 25 years, Boliden Mineral AB has developed a reliable, costeffective grinding circuit. Three senior engineers outline this success story	48	Viscaria This small, high grade Swedish copper mine may be part of a major copperbelt John Chadwick investigates	61
Preventive Maintenance Lube schedules aren't the whole story, says Jim Carrieri of McLanahan Corp.	54	Small Mines Symposium Helsinki, Finland was the site of the second symposium.	64
Auto Fine Crushing Kobe Steel Ltd. has devised a method	57	Malaysia's Largest Amang Plant John Chadwick reports on Beh Minerals, a producer of tin as well as rare earths	69
		Japanese Technology A comprehensive study of the latest in technology for the international mining industry from this leading industrial nation	71

## DECEMBER 1983

Elura 436  
This new Australian zinc-silver-lead producing underground mine has a shaft system with a number of innovations.

Deep Water Mineral Recovery 446  
A technique for recovering ore from the bottom of a lake 128 m deep in British Columbia, Canada is described.

**Dense Medium Separation** 453  
An introduction to the theory and practice of DMS is followed by a summary of the manufacturers involved in this process, which has increasing application.

Loss Control Management 470  
Close attention to improved efficiency leads not only to higher productivity, but also to fewer accidents.
