Flora of Arslanbey (İzmit/Turkey) and cultivated plants in Izmit city center

Oğuzhan ASLAN *¹, Mehmet SAĞIROĞLU¹

¹ Sakarya University, Faculty of Arts and Sciences, Department of Biology, Sakarya, Turkey.

Abstract

Research area includes the Town of Arslanbey that is situated within the borders of Kocaeli, Karatepe Mountain and the city centre of İzmit. In this study 918 specimens were collected. After the determination of the specimens 344 genera and 489 species and subspecies taxa were identified belonging to 101 families. 54 of these taxa is cultivar, 435 of them are in the natural plant. Most of the cultivated plants are introduced from outside our country. 11 of taxa are endemic to Turkey and their endemism rate is (2,55 %). Phytogeographical elements of the area are as follows; Euro-Siberian 102 (20,85 %), Irano-Turanian 11 (2,24 %), Meditarrenean 60 (12,26 %), and the others, wide spreaded and phytogeographical region unidentified are 317 (64,82 %). The 5 of the taxa identified belong to Pteridophyta and of 484 to Spermatophyta.

Key words: Flora, Arslanbey, Karatepe, İzmit

Arslanbey (İzmit) florası ve İzmit şehir merkezindeki kültür bitkileri

Özet

Araştırma alanı, Kocaeli ili sınırları içinde yer alan Arslanbey Beldesi, Karatepe Dağı ve İzmit şehir merkezini içermektedir. Alandan toplanan 918 bitki örneğinin değerlendirilmesi sonucu 101 familyaya ait 344 cins ve 489 tür ve tür altı seviyede takson tespit edilmiştir. Bu taksonların 54 tanesi kültür olup diğer 435 takson doğaldır. 11 takson Türkiye için endemik olup endemizm oranı % 2,55'tir. Taksonların fitocoğrafik bölgelere dağılımı ise şöyledir: Avrupa-Sibirya 102 (% 20,85), İran-Turan 11 (% 2,24), Akdeniz 60 (% 12,26) ve geniş yayılışlılar ile fitocoğrafik bölgесine karar verilemeyecekler ise 317 (% 64,82)'dır. Tespit edilen taksonların 5'i Pteridophyta, 484'ü ise Spermatophyta'ya aittir.

Anahtar kelimeler: Flora, Arslanbey, Karatepe, İzmit

1. Introduction

Our country is one of the richest and the most interesting countries in the world in terms of its plants, as in other fields. So the flora studies are important to reveal the wealth of our country. Research field is a transitional region between Mediterranean and Euro-Siberian phytogeographical regions. It is also located in the square of A2 according to the grid system adopted by Davis in Flora of Turkey (Davis, 1965-85).

Arslanbey rural is located in the piedmonts of Mount of Samanlı which is about 150 m above sea level and in 17 km south east of İzmit district, Kocaeli. Arslanbey rural owns a topographic configuration flattening from south to north and is different from other settlements with natural thresholds (Figure 1). There are stream beds that separate the field from others and also flowing from the north to the south (Anonim, 2001).

When we apply Emberger's formulation for Kocaeli, the result is; $Q = 108,36$ and $m = 3,3^{\circ}\text{C}$. So the bioclimatic coating for Kocaeli station is determined as precipitated, mild Meditarrenean climate type (Akman, 1999). According to decreasing precipitation amount of Kocaeli observation station, the precipitation regime is as follows; W (273,9), A (228,1), S (169,9), S (140,5) (winter, autumn, spring, summer).

According to this, precipitation regime of the research field is Central Mediterranean. Maximum precipitation is in December with 105,6 mm and in January with 93,9 mm and minimum precipitation is in July with 42,7 mm and in May with 44,7 mm according to Kocaeli observation station. And the average precipitation is 812,4 mm (Figure 2). Ombro-thermic diagram of research area was drawn using average temperatures and monthly average precipitation amounts.

2. Materials and methods

A total amount of 918 plant specimens were collected between 2008 and 2011. The specimens collected were pressed and dried accordingly and prepared as herbarium material. The specimens were identified according to the Flora of Turkey and the East Aegean Islands (Davis, 1965-85), Suppl. 1, Vol. 10 (Davis et al., 1988), Vol. 11 (Güner et al., 2000), Flora Europaea Vol. 1-5 (Tutin et al., 1964-80), Flora Iranica (Rechinger, 1981), Flora Palaestina Vol. 1 (Zohary, 1966), Flora D'Italia Vol. 3 (Pignatti, 1982), were used as resource. Moreover in identification of cultivated plants, books named as Türkiye'nin Ağaçları ve Çalıları (Mamikoğlu, 2010), Süs Bitkileri ve Yer Örtücüler (Acartürk, 2001), Kültürpark'ın (İzmir) Ağaç ve Çalı Türleri (Gemici et al., 1992), Ankara'nın Egzotik Ağaç ve Çalıları (Arslan and Çeleb, 2001) were used and for controlling plant names authors Authors of Plant Names (Brummitt and Powell, 1999) was used. For learning morphological terms İngilizce-Türkçe Botanik Kılavuzu (Baytop, 1998) and Botanical Latin (Stearn, 1973) were used. These plants were identified that given to proper order the Flora of Turkey. The cultivated plants found in the area, particularly in the İzmit city center, are given in the floristic list with together. For the map of research field, Google Earth was used.

Meteorological data belonging to Kocaeli Province was obtained from Turkish State Meteorological Service (Anonim, 2009). Climate diagrams belonging to the research field was drawn according to Gausen method. For climatic evaluation of research area the formulation of Emberger's which he developed for Mediterranean climate layers classification, and drought degrees was used. For the interpretation of the data about climate the book 'İklim ve Biyoiklim' (Akman, 1999) was used.

T. officinale Weber, 3, 80-100 m, 02.03.2008, OA 1628.

Crepis alpestris (Jacq.) Tausch, 3, 80 m, 20.05.2008, OA 1285. Euro-Sib. el.

C. setosa Hall. F., 6, 300-350 m, 22.05.2010, OA 1826. Euro-Sib. el.

Zinnia elegans Jacq., 2, 90 m, 30.07.2008, OA 1450. Cult. Non-Turkey (Foreign).

CAMpanulaceae

Campanula latifolia L., 2, 80 m, 27.05.2008, OA 1309. Euro-Sib. El.

C. persicifolia L., 3, 80-90 m, 16.05.2008, OA 1178. Euro-Sib. el.

ERICACEAE

Rhododendron ponticum L., 6, 450-500 m, 20.05.2009, OA 1659. Eux. el..

Erica arborea L., 6, 400-450 m, 16.11.2008, OA 1599.

Arbutus unedo L., 4, 80-150 m, 14.08.2010, OA 1915.

Vaccinium arctostaphylos L., 6, 500-600 m, 14.09.2008, OA 1506. Eux. el..

PRIMULACEAE

Primula vulgaris Huds. subsp. *sibthorpii* (Hoffmanns.) W. W. Sm. & Forrest, 6, 400-450 m, 20.03.2010, OA 1730. Eux. el..

Androsace maxima L., 6, 350-400 m, 18.04.2010, OA 1769.

Anagallis arvensis L. var. *arvensis*, 6, 500-600 m, 17.05.2008, OA 1229.

EBENACEAE

Diospyros lotus L., 4, 80-100 m, 22.05.2010, OA 1827.

STYRACACEAE

Styrax officinalis L., 6, 300-350 m, 18.04.2010, OA 1770.

OLEACEAE

Jasminum fruticans L., 4, 80-100 m, 29.06.2008, OA 1407. Medit. el..

Fraxinus excelsior L. subsp. *excelsior*, 7, 15 m, 14.09.2008, OA 1494. Euro-Sib. el.

F. angustifolia Vahl. subsp. *angustifolia*, 7, 01. 10.2008, OA 1527.

Ligustrum vulgare L., 6, 250-300 m, 17.05.2008, OA 1208. Euro-Sib. el.

L. japonicum Thunb., 2, 80 m, 29.06.2008, OA 1408. Cult. Non-Turkey (Foreign).

Olea europaea L. var. *europaea*, 5, 200 m, 18.06.2008, OA 1360. Cult. Medit. el..

O. europaea L. var. *sylvestris* (Miller) Lehr., 6, 300-350 m, 16.11.2008, OA 1595. Medit. el..

Phillyrea latifolia L., 6, 600-700 m, 22.05.2010, OA 1828. Medit. el..

APOCYNACEAE

Nerium oleander L., 2, 80 m, 18.04.2010, OA 1771. Cult. Medit. el..

Vinca herbacea Waldst. & Kit., 4, 80-100 m, 03.04.2008, OA 1093.

V. major L. subsp. *major*, 4, 80-150 m, 03.04.2008, OA 1100 A. Medit. el..

V. minor L., 4, 100 m, 03.04.2008, OA 1100 B.

ASCLEPIADACEAE

Vincetoxicum canescens (Willd.) Decne. subsp. *canescens*, 4, 100-150 m, 30.08.2008, OA 1465.

GENTIANACEAE

Centaurium erythraea Rafn. subsp. *turcicum* (Velen.) Melderis, 6, 200-300 m, 22.05.2010, OA 1829.

Gentianella caucasaea (Loddiges ex Sims) Holub, 6, 500-600 m, 17.07.2010, OA 1889. Eux. el..

CONVOLVULACEAE

Convolvulus arvensis L., 5, 150-200 m, 17.05.2008, OA 1226.

Calystegia sepium (L.) R. Br. subsp. *sepium*, 5, 150-200 m, 09.07.2008, OA 1411.

Ipomea purpurea (L.) Roth., 4, 80-150 m, 22.05.2010, OA 1830.

BORAGINACEAE

Lappula squarrosa (Retz.) Dumort., 6, 380-400 m, 17.05.2008, OA 1227.

Myosotis arvensis (L.) Hill subsp. *arvensis*, 6, 300-350 m, 17.05.2008 1209. Euro-Sib. el..

Echium italicum L., 3, 90 m, 22.05.2010, OA 1831. Medit. el..

E. vulgare L., 5, 22.05.2010, OA 1832. Euro-Sib. el..

E. plantagineum L., 6, 200-250 m, 17.05.2008, OA 1233. Medit. el..

Onosma bracteosum Hausskn. & Bornm., 6, 450-600 m, 22.05.2010, OA 1833. End. Ir.-Tur. el..

Cerinthe minor L. subsp. *auriculata* (Ten.) Domac, 6, 300-400 m, 22.05.2010, OA 1834.

Trachystemon orientalis (L.) G. Don, 6, 400-500 m, 20.05.2009, OA 1691. Eux. el..

Anchusa officinalis L., 6, 200-250 m, 17.05.2008, OA 1187. Euro-Sib. el..

A. undulata L. subsp. *hybrida* (Ten.) Coutinho, 6, 300 m, 16.11.2008, OA 1601. Medit. el..

Alkanna tinctoria (L.) Tausch. subsp. *anatolica* Hub.-Mor., 3, 90-110 m, 18.05.2008, OA 1270. E. Medit. el..

SOLANACEAE

Solanum dulcamara L., 6, 400-500 m, 22.05.2010, OA 1835. Euro-Sib. el..

Physalis alkekengi L., 6, 450-500 m, 22.05.2010, OA 1836.

SCROPHULARIACEAE

Verbascum orientale (L.) All., 6, 250-300 m, 20.05.2009, OA 1672. E. Medit. el..

Scrophularia canina L. subsp. *bicolor* (Sm.) Greuter, 6, 250-300 m, 16.11.2008, OA 1586. E. Medit. el..

Antirrhinum majus L. subsp. *majus*, 3, 80 m, 17.05.2008, OA 1242. W. Medit. el..

Digitalis ferruginea L. subsp. *ferruginea*, 2, 80 m, 18.05.2008, OA 1268 A. Euro-Sib. el..

D. purpurea L., 2, 80 m, 18.05.2008, OA 1268 B. Cult. Non-Turkey (Foreign).

Veronica anagalloides Guss. subsp. *heureka* M. A. Fischer, 6, 600-700 m, 17.05.2008, OA 1234. Ir.-Tur. el..

V. chamaedrys L, 6, 600-650 m, 18.04.2010, OA 1772. Euro-Sib. el..

Parentucellia latifolia (L.) Caruel subsp. *latifolia*, 3, 80 m, 18.05.2008, OA 1282. Medit. el..

Bellardia trixago (L.) All., 5, 200-250 m, 20.03.2010, OA 1731.

Paulownia tomentosa (Thunb.) Steud., 8, 15 m, 17.07.2010, OA 1893. Cult. Non-Turkey (Foreign).

VERBENACEAE

Verbena officinalis L., 3, 90 m, 21.06.2008, OA 1378.

Clerodendrum bungei Steud., 2, 80 m, 09.07.2008, OA 1412. Cult. Non-Turkey (Foreign).

LAMIACEAE (LABIATAE)

Ajuga orientalis L., 6, 400-500 m, 18.04.2010, OA 1773.

Teucrium chamaedrys L. subsp. *chamaedrys*, 6, 450-500 m, 19.06.2010, OA 1872. Euro-Sib. el..

Rosmarinus officinalis L., 2, 80 m, 15.03.2008, OA 1049. Medit. el..

Scutellaria hastifolia L., 3, 80 m, 18.05.2008, OA 1253. Euro-Sib. el..

Lamium maculatum L. var. *maculatum*, 6, 450-500 m, 28.02.2009, OA 1637. Euro-Sib. el..

Ballota nigra L. subsp. *anatolica* P. H. Davis, 4, 100-150 m, 01.04.2008, OA 1091. End. Ir-Tur. el..

Sideritis montana L. subsp. *remota* (D'Urv.) P.W. Ball. ex Heywood, 6, 350-400 m, 22.05.2010, OA 1837. Medit. el..

Stachys germanica L. subsp. *bithynica* (Boiss.) R. Bhattacharjee, 6, 600-700 m, 18.05.2008, OA 1281. Euro-Sib. el.

S. recta L. subsp. *subcrenata* (Vis.) Briq, 2, 80 m, 26.06.2008, OA 1387. E. Medit. el.

S. iberica Bieb. subsp. *iberica* var. *densipilosa* R. Bhattacharjee, 6, 600 m, 17.07.2010, OA 1895. End. Ir-Tur. el..

S. annua L. subsp. *cilicia* (Boiss.) R. Bhattacharjee, 3, 80 m, 18.05.2008, OA 1280. End. E. Medit. el..

Nepeta italicica L. subsp. *italicica*, 6, 250-300 m, 16.11.2008, OA 1585.

Prunella vulgaris L., 6, 300-350 m, 22.05.2010, OA 1838. Euro-Sib. el.

Origanum vulgare L. subsp. *vulgare*, 6, 200-250 m, 17.07.2008, OA 1430. Euro-Sib. el.

Calamintha nepeta (L.) Savi subsp. *glandulosa* (Req.) P. W. Ball., 4, 100-150 m, 19.06.2010, OA 1873.

Thymus longicaulis C. Presl subsp. *longicaulis* var. *longicaulis*, 3, 90 m, 18.04.2010, OA 1774.

Mentha pulegium L., 3, 90 m, 26.08.2008, OA 1460.

M. × piperita L., 3, 80 m, 29.06.2008, OA 1405.

M. suaveolens Ehrh., 6, 300-350 m, 21.06.2008, OA 1374. Medit. el..

M. longifolia (L.) Huds. subsp. *typhoides* (Briq.) Harley var. *typhoides* (L.) Huds., 6, 500-600 m, 29.06.2008, OA 1399.

M. spicata L. subsp. *tomentosa* (Briq.) Harley, 3, 90 m, 14.07.2008, OA 1422.

Salvia tomentosa Mill., 6, 650-700 m, 18.04.2010, OA 1775. Medit. el..

S. sclarea L., 4, 80-100 m, 22.05.2008, OA 1288.

S. virgata Jacq., 5, 150-200 m, 20.04.2008, OA 1139. Ir.-Tur. el..

BUDDLEJACEAE

Buddleja davidii Franch., 2, 80 m, 30.07.2008, OA 1451. Cult. Non-Turkey (Foreign).

PLANTAGINACEAE

Plantago major L. subsp. *major*, 6, 600-700 m, 19.06.2010, OA 1874.

P. lanceolata L., 6, 250-300 m, 17.05.2008, OA 1213.

THYMELAEACEAE

Daphne pontica L., 6, 250-300 m, 20.03.2010, OA 1732. Eux. el..

ELAEAGNACEAE

Elaeagnus angustifolia L. var. *orientalis* L., 3, 90 m, 18.05.2008, OA 1275.

LAURACEAE

Laurus nobilis L., 3, 80 m, 03.04.2008, OA 1094. Medit. el..

SANTALACEAE

Osyris alba L., 6, 300-350 m, 17.05.2008, OA 1191. Medit. el..

LORANTHACEAE

Viscum album L. subsp. *album*, 6, 300-350 m, 20.03.2010, OA 1733.

ARISTOLOCHIACEAE

Asarum europaeum L., 6, 450-500 m, 20.03.2010, OA 1734. Euro-Sib. el.

Aristolochia clematitis L., 6, 400-500 m, 18.04.2010, OA 1776. Euro-Sib. el.

A. bottae Jaub. & Spach, 6, 550-600 m, 20.03.2010, OA 1735. Ir.-Tur. el..

EUPHORBIACEAE

Euphorbia helioscopia L., 6, 250-300 m, 17.05.2008, OA 1204.

E. falcata L. subsp. *falcata* var. *falcata*, 6, 400-500 m, 18.04.2010, OA 1777.

URTICACEAE

Urtica dioica L., 6, 500-600 m, 16.11.2008, OA 1588. Euro-Sib. el.

CANNABACEAE

Humulus lupulus L., 4, 100-150 m, 30.08.2008, OA 1469. Euro-Sib. el.

MORACEAE

Morus alba L., 5, 150-200 m, 22.05.2010, OA 1839.

M. nigra L., 5, 150-200 m, 22.05.2010, OA 1840.

Ficus carica L. subsp. *carica* (All.)

Schinz. & Thell., 6, 250-300 m, 16.11.2008, OA 1594.

ULMACEAE

Ulmus glabra Huds., 7, 15 m, 14.09.2008, OA 1500. Euro-Sib. el.

U. laevis Pall., 4, 80-150 m, 20.03.2010, 1736. Euro-Sib. el.

Zelkova carpinifolia (Pallas) C. Koch., 8, 5 m, 01.10.2008, OA 1523. Eux. el..

Celtis australis L., 6, 400-450 m, 20.03.2010, OA 1737. Medit. el..

JUGLANDACEAE

Juglans regia L., 6, 300-350 m, 16.11.2008, OA 1579.

Pterocarya fraxinifolia (Poiret.) Spach., 6, 250-300 m, 19.06.2010, OA 1875. Eux. el..

PLATANACEAE

Platanus orientalis L., 8, 15 m, 01.10.2008, OA 1547.

P. occidentalis L., 8, 15 m, 01.10.2008, OA 1552. Cult. Non-Turkey (Foreign).

FAGACEAE

Fagus orientalis Lipsky, 6, 300-500 m, 22.05.2010, OA 1841. Euro-Sib. el.

Castanea sativa Mill., 6, 500-600 m, 16.11.2008, OA 1587. Euro-Sib. el.

Quercus frainetto Ten., 4, 80-100 m, 22.05.2010, OA 1842. Euro-Sib. el..

Q. petraea (Mattuschka) Liebl. subsp. *iberica* (Steven ex Bieb.) Krassiln., 6, 500-600 m, 16.11.2008, OA 1576 B.

Q. cerris L. var. *austriaca* Willd. Loudon, 6, 150-200 m, 16.11.2008, OA 1576 A. Euro-Sib. el..

CORYLACEAE

Carpinus betulus L., 6, 250-300 m, 17.07.2010, OA 1890. Euro-Sib. el.

Ostrya carpinifolia Scop., 6, 200-250 m, 17.05.2008, OA 1244. Medit. el..

Corylus avellana L. var. *avellana*, 6, 200-300 m, 20.03.2010, OA 1738. Euro-Sib. el..

BETULACEAE

Alnus glutinosa (L.) Gaertner subsp. *glutinosa*, 6, 200-250 m, 18.04.2010, OA 1778. Euro-Sib. el.

SALICACEAE

Salix alba L., 6, 150-250 m, 18.04.2010, OA 1779. Euro-Sib. el.

S. babylonica L., 8, 15 m, 14.09.2008, OA 1493.

S. caprea L., 6, 250-450 m, 18.04.2010, OA 1780. Euro-Sib. el..

Populus alba L., 6, 400-450 m, 20.03.2010, OA 1739. Euro-Sib. el..

P. nigra L. subsp. *nigra*, 8, 15 m, 01.10.2008, OA 1546.

MONOCOTYLEDONES

ALISMATACEAE

Alisma lanceolatum With., 3, 90 m, 29.06.2008, OA 1391.

CANNACEAE

Canna indica L., 2, 80 m, 17.07.2008, OA 1437. Cult. Turkey plant.

ARECACEAE (PALMAE)

Phoenix canariensis Hort. ex Chabaud, 8, 10 m, 18.04.2010, OA 1781. Cult. Turkey plant.

Chamaerops humilis L., 8, 15 m, 20.03.2010, OA 1740. Cult. W. Medit. el..

Washingtonia filifera (J. Linden ex Andre) H. Wendl, 8, 5-10 m, 14.08.2010, OA 1916. Cult. Turkey plant.

ARACEAE

Spathiphyllum wallisi, 2, 90 m, 24.06.2008, OA 1383. Cult. Non-Turkey (Foreign).

LILIACEAE

Smilax excelsa, L., 6, 450-600 m, 22.05.2010, OA 1843. Medit. el..

S. aspera L., 6, 350-400 m, 18.04.2010, OA 1782.

Ruscus aculeatus L., var. *aculeatus*, 6, 200-250 m, 20.03.2010, OA 1741.

R. hypoglossum L., 6, 400-450 m, 20.03.2010, OA 1742. Euro-Sib. el.

Asparagus aphyllus L., subsp. *orientalis* (Baker) P. H. Davis 3, 90 m, 15.06.2008, OA 1336. Medit. el..

Ornithogalum sphaerocarpum Kerner, 6, 500-600 m, 18.04.2010, OA 1783.

Muscari tenuiflorum Tausch., 4, 90-110 m, 08.03.2009, OA 1626.

M. neglectum Guss., 3, 80 m, 01.04.2008, OA 1088.

Tulipa schrenkii Regel, 7, 15 m, 10.04.2008, OA 1112. Cult. Non-Turkey (Foreign).

Gagea chrysantha (Jan) Schultes & Schultes fil., 3, 90 m, 13.03.2008, OA 1011. Medit. el..

Yucca gloriosa L., 8, 15 m, 19.10.2008, OA 1557. Cult. Turkey plant.

AMARYLLIDACEAE

Agave americana L., 3, 80 m, 14.08.2010, OA 1917.

Leucojum aestivum L., 5, 150-200 m, 20.03.2010, OA 1743. Euro-Sib. el.

Clivia miniata Regel, 2, 80 m, 11.06.2008, OA 1324. Cult. Non-Turkey (Foreign).

IRIDACEAE

Iris pseudacorus L., 6, 150-200 m, 17.05.2008, OA 1189.

I. suaveolens Boiss. & Reuter, 2, 90 m, 18.05.2008, OA 1245. E. Medit. el..

ORCHIDACEAE

Cephalanthera longifolia (L.) Fritsch, 6, 700-750 m, 18.04.2010, OA 1784. Euro-Sib. el.

Orchis papilionacea L. var. *papilionacea*, 6, 300-350 m, 20.03.2010, OA 1744.

TYPHACEAE

Typha latifolia L., 5, 150-200 m, 19.06.2010, OA 1876.

CYPERACEAE

Carex pendula Huds., 6, 150-250 m, 22.05.2010, OA 1844. Euro-Sib. el.

POACEAE-(GRAMINEAE)

Brachypodium sylvaticum (Huds.) P. Beauv., 3, 90-110 m, 02.06.2008, OA 1317. Euro-Sib. el.

Elymus elongatus Host. Runemark subsp. *turcicus* (Macguire) Melderis, 6, 300-400 m, 19.06.2010, OA 1877.

E. repens (L.) Gould subsp. *repens*, 6, 450-600 m, 19.06.2010, OA 1878.

Aegilops geniculata Roth., 5, 150-200 m, 18.04.2010, OA 1785. Medit. el..

Hordeum marinum Huds. var. *marinum*, 4, 80-100 m, 22.05.2010, OA 1845.

H. bulbosum L., 6, 400-500 m, 22.05.2010, OA 1846.

Bromus arvensis L., 6, 350-450 m, 19.06.2010, 1879.

B. japonicus Thunb. subsp. *japonicus*, 6, 250-300 m, 20.05.2009, OA 1666.

B. tectorum L. subsp. *tectorum*, 6, 300-350 m, 20.05.2009, OA 1670.

B. sterilis L., 6, 300-350 m, 20.05.2009, OA 1697.

B. inermis Leysser, 6, 500-600 m, 19.06.2010, OA 1880.

Avena barbata Pott. ex Link subsp. *barbata*, 6, 500-550 m, 20.05.2009, OA 1650. Medit. el..

A. sativa L., 6, 250 m, 17.05.2008, OA 1216.

Koeleria nitidula Velen., 6, 400-500 m, 22.05.2010, OA 1847.

Holcus lanatus L., 4, 100-150 m, 09.07.2008, OA 1410. Euro-Sib. el.

Ammophila arenaria (L.) Link subsp. *arundinacea* H. Lindb. Fil., 6, 400-500 m, 19.06.2010, OA 1881. Medit. el..

Apera intermedia Hack., 6, 400-450 m, 20.05.2009, OA 1669. Ir.-Tur. el..

Agrostis stolonifera L., 6, 400-500 m, 10.06.2010, OA 1882. Euro-Sib. el.

Alopecurus myosuroides Huds. var. *myosuroides*, 5, 100-150 m, 08.03.2009, OA 1614. Euro-Sib. el.

4. Discussion

In the consequence of the evolution of the plant samples collected during floristic studies 101 family, 344 genera, 489 species and subspecies taxa were determined. 5 of 489 taxa are included in Pteridophyta and 484 taxa in Spermatophyta. While Gymnospermae is represented with 17 taxa, 467 taxa belong to Angiospermae. In research area 11 endemic taxa were identified and their endemism rate is 2,55 %. The most important reason for his low rate in the area is Euro-Siberian phytogeographic region has less endemic plant species than the other phytogeographic region in our country.

The number of the species whose phytogeographic region known is 172 out of 489 taxa identified in research field. 102 of the species whose phytogeographical region is known Euro-Siberian (20,85 %), 6 of them Mediterranean (12,26 %) and 11 of them is Irano-Turanian (2,24 %). 22 taxa identified as Euxine element are included in Euro-Siberian phytogeographical region. The number of the taxa, within the total amount of 489 taxa, whose phytogeographical region unknown is 317 (64,82 %)

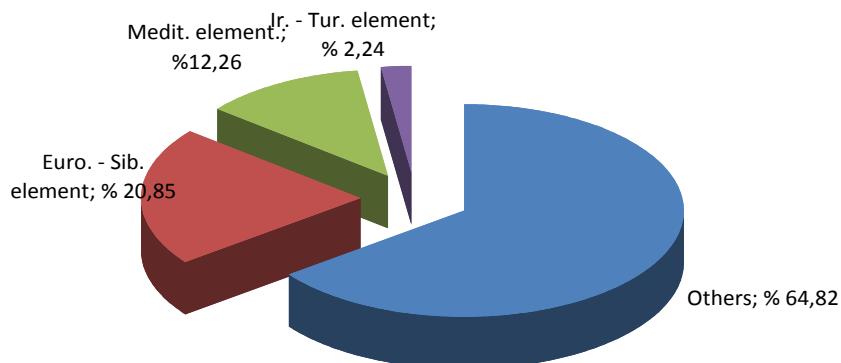

Figure 3. Spectrum of phytogeographical region elements

The families including the largest genera in research field are Compositae (36), Gramineae (24), Leguminosae (23), Rosaceae (23), Umbelliferae (16), Cruciferae (16), Labiatae (15), Caryophyllaceae (8), Boraginaceae (8), Liliaceae (8) (Table 1). The families including the largest genera are ordered as Gramineae , Compositae and Umbelliferae

Table 1. 10 families including the highest number of genus and their rates (%)

| Family | Number of Genus | Rates of Genus to Total Number of Genus(%) |
|-----------------|-----------------|--|
| Compositae | 36 | 10,46 |
| Gramineae | 24 | 6,97 |
| Leguminosae | 23 | 6,68 |
| Rosaceae | 23 | 6,68 |
| Umbelliferae | 16 | 4,65 |
| Cruciferae | 16 | 4,65 |
| Labiatae | 15 | 4,36 |
| Caryophyllaceae | 8 | 2,32 |
| Boraginaceae | 8 | 2,32 |
| Liliaceae | 8 | 2,32 |

Table 2. Families and their rates (%) including the highest number of species and subspecies

| Family | Number of Species | Rates of Species to Total Number of the Species (%) |
|------------------|-------------------|---|
| Compositae | 47 | 9,61 |
| Leguminosae | 42 | 8,58 |
| Rosaceae | 37 | 7,56 |
| Gramineae | 34 | 6,95 |
| Labiatae | 24 | 4,90 |
| Caryophyllacea e | 22 | 4,49 |
| Cruciferae | 21 | 4,29 |
| Umbelliferae | 18 | 3,68 |
| Ranunculaceae | 11 | 2,24 |
| Boraginaceae | 11 | 2,24 |
| Liliaceae | 11 | 2,24 |
| Others | 211 | 43,14 |

The highest number of species and subspecies in research field includes the families as follows; Compositae (47), Leguminosae (42), Rosaceae (37), Gramineae (34), Labiatae (24), Caryophyllaceae (22), Cruciferae (21), Umbelliferae (18), Ranunculaceae (11), Boraginaceae (11), Liliaceae (11). Other 211 taxa left belong to other families. In the Table 2. 11 families including the highest number of species and subspecies and their rates to total number of species and subspecies are given.

Trifolium is the genus including the highest number of species in research are with a number of 11 species.Silene (9), Rosa (7), Ranunculus, Prunus, Mentha and Bromus with a number of (5) species, Acer, Vicia, Senecio and Stachys genera with (4) species follow Trifolium (Table 3).

First 10 families including the highest number of genera according to Flora of Turkey are Gramineae, Compositae, Umbelliferae, Cruciferae, Leguminosae, Labiatae, Caryophyllaceae, Boraginaceae, Liliaceae and Rosaceae. Compositae, Gramineae and Leguminosae families come in first three row in research area. The comparison of the families rich in number of species with studies around and the other flora studies carried out near the research

area ‘ Flora of Beşkayalar Valley (Akaydin et al., 2006)’, Flora of Kayışdağı (İstanbul/Turkey) and floristic comparision with neighboring floras (Akaydin et al., 2011) is given in Table 4.

Table 3. Genera including the highest number of taxa in species and subspecies level and their rates

| Genus | Number of Species | Rates of Species % |
|------------|-------------------|--------------------|
| Trifolium | 11 | 2,24 |
| Silene | 9 | 1,84 |
| Rosa | 7 | 1,43 |
| Ranunculus | 5 | 1,02 |
| Prunus | 5 | 1,02 |
| Mentha | 5 | 1,02 |
| Bromus | 5 | 1,02 |
| Acer | 4 | 0,81 |
| Vicia | 4 | 0,81 |
| Senecio | 4 | 0,81 |
| Stachys | 4 | 0,81 |

Table 4. Comparison of families in research area rich in terms of genus amount with other studies around

| Family | Number of the Genus | Rates of Genus (%) | Number of the Genus | Rates of Genus (%) | Number of the Genus | Rates of Genus (%) |
|-----------------|---------------------|--------------------|---------------------|--------------------|---------------------|--------------------|
| Compositae | 36 | 10,46 | 27 | 13,98 | 36 | 13,74 |
| Gramineae | 24 | 6,97 | 10 | 5,18 | 31 | 11,83 |
| Leguminosae | 23 | 6,68 | 8 | 4,14 | 19 | 7,25 |
| Rosaceae | 23 | 6,68 | 10 | 5,18 | 11 | 4,19 |
| Umbelliferae | 16 | 4,65 | 7 | 3,62 | 10 | 3,81 |
| Cruciferae | 16 | 4,65 | 4 | 2,07 | 17 | 6,48 |
| Labiatae | 15 | 4,36 | 8 | 4,14 | 14 | 5,34 |
| Caryophyllaceae | 8 | 2,32 | 10 | 5,18 | 11 | 4,19 |
| Boraginaceae | 8 | 2,32 | 5 | 2,59 | 6 | 2,29 |
| Liliaceae | 8 | 2,32 | 6 | 3,10 | 10 | 3,81 |

Table 5. Comparison of families in research area rich in terms of species amounts with other studies in neighbourhood

| Family | 1 | | 2 | | 3 | |
|-----------------|-----------------------|----------------------|-----------------------|----------------------|-----------------------|----------------------|
| | Number of the Species | Rates of Species (%) | Number of the Species | Rates of Species (%) | Number of the species | Rates of Species (%) |
| Compositae | 47 | 9,61 | 41 | 13,7 | 65 | 13,65 |
| Leguminosae | 42 | 8,58 | 14 | 4,7 | 63 | 13,23 |
| Rosaceae | 37 | 7,56 | 13 | 4,4 | 14 | 2,94 |
| Gramineae | 34 | 6,95 | 12 | 4 | 46 | 9,66 |
| Labiatae | 24 | 4,90 | 12 | 4 | 23 | 4,83 |
| Caryophyllaceae | 22 | 4,49 | 16 | 5,4 | 20 | 4,20 |
| Cruciferae | 21 | 4,29 | 8 | 2,73 | 22 | 4,62 |
| Umbelliferae | 18 | 3,68 | 7 | 2,38 | 13 | 2,73 |
| Ranunculaceae | 11 | 2,24 | 7 | 2,38 | 11 | 2,31 |
| Boraginaceae | 11 | 2,24 | 7 | 2,38 | 10 | 2,10 |
| Liliaceae | 11 | 2,24 | 7 | 2,38 | 18 | 3,78 |

According to Flora of Turkey families rich in terms of genus amount are Compositae, Leguminosae, Labitae, Cruciferae, Caryophyllaceae, Scrophulariaceae, Umbelliferae, Liliaceae and Boraginaceae. Compositae, Leguminosae and Rosaceae families came in first three rows in research area (Table 5). The comparison of the families rich in genus amount with studies around and other flora studies carried out by Galip Akaydin, Gözde Çalışkan and Emine Burcu Yılmaz ‘ Flora of Beşkayalar Valley (Gölcük-Kocaeli) (Akaydin et all., 2006)’, The Flora of Kayışdağı (İstanbul/Turkey) and floristic comparision with neighboring floras (Akaydin et all., 2011)’ is given in Table 5.

Endangered categories of the endemic plants collected from the research area was arranged again considering Türkiye Bitkileri Kırmızı Kitabı (Ekim et all., 2000) and 2001 IUCN categories. Endemic taxa discovered in consequence of our research and shown in the table above and their endangered categories are as follows;

| | |
|--|----|
| <i>Abies nordmanniana</i> (Stev.) Spach subsp. <i>bornmuelleriana</i> | LC |
| <i>Linum hirsutum</i> L. subsp. <i>anatolicum</i> (Boiss.) Hayek var. <i>platyphyllum</i> Davis..... | EN |
| <i>Astragalus asciocalyx</i> Bunge..... | LC |
| <i>Asperula lilaciflora</i> Boiss. subsp. <i>phrygia</i> (Bornm.) Schönb.-Tem..... | LC |
| <i>Onopordum anatolicum</i> (Boiss.) Eig..... | LC |
| <i>Jurinea pontica</i> Hausskn. & Freyn ex Hausskn..... | LC |
| <i>Hieracium bithynicum</i> (Zahn) Sell & West..... | DD |
| <i>Onosma bracteosum</i> Hausskn. & Bornm..... | LC |
| <i>Ballota nigra</i> L. subsp. <i>anatolica</i> P. H. Davis..... | LC |
| <i>Stachys iberica</i> Bieb. subsp. <i>iberica</i> Bieb. var. <i>densipilosa</i> R. Bhattacharjee..... | LC |
| <i>Stachys annua</i> L. subsp. <i>cilicia</i> (Boiss.) R. Bhattacharjee..... | LC |

Due to the fact that there are stone quarry, uncontrolled grazing in research area and attempts to make up settlement and to open field, natural environment spoils and this gives extreme harm to the ecosystem of the area.

Acknowledgements

Special thanks to Research Assistant Bilgehan BİLGİLİ and to Research Assistant Mehmet Ufuk ÖZBEK from Gazi University Science Faculty and to Herbarium Expert Serdar ASLAN from Düzce University Forestry Faculty for their help in determination of some plants.
