Multidisciplinary COVID 19 Book, a CME Book

• **Cem Heper, M.D**

Bursa Medical Chamber,, Bursa, Turkey

Dear editor,

The newest health emergency of our day, Covid-19, has surely caused deep changes in our lives and continues to threaten our freedom. There exists a need to better our tomorrow, through diligent work and extraordinary sacrifice. The illness continues to spread worldwide and end lives.

The first and most detailed medical training book of our times, compiling the efforts of 52 distinct authors, Multidisciplinary COVID-19, has been published by Bursa Medical Chamber Press on 1st of July, 2020 (Figure 1). The chapter on COVID-19 and Ophthalmology chapter is a valuable guide to the future for all healthcare professionals. The chapter by Dr. Osman Okan Olcaysu, Dr. Berna Akova, and Dr. Sertaç Argun Kıvanç covers the necessary protection, triage, and changes in other processes, as well as ophthalmological problems in light of the COVID-19 pandemic.(1) Options available to healthcare professionals on the ophthalmological complications and their treatments, minimizing risk, and prescribed processes as they relate to COVID-19 have also been a focus of this chapter.

Our book includes insights to the problems, experiences, guidelines, and research findings of a plethora of disciplines, including: Epidemiology, Virology, Immunolo-
