

**About the second issue...**

We are in happiness as we achieve to perform our goal including publications from all areas of health sciences which are in our journal plans significantly. In our first issue, we had publications in the field of healths. Also, in our second issue we tried to create an internationally respected journal with a similar editorial policy.

In this issue, there are three original articles; two case report and a review. The articles' branches are Guidance and Psychological Counseling, Orthopedics, Obstetrics and Gynecology, Psychiatry, Nursing and dentistry. While the first original article was reviewing attention hyperactivity according to the teachers' perception, the second was about effect of depressive emotional state on the efficacy of physical therapy and the third was about colposcopic evaluation of pre and postmenopausal women. In addition, the case reports are about an interesting piercing injury of the hip and Burkitt's Lymphoma presenting. The moreover review presented alternative methods in the management of menopausal symptoms

In our journal publications process, I extend my thanks to our authors, article assessment referees, our editorial board members and our technical team for their support.
