

S23. NATIONAL AND INTERNATIONAL LEGISLATIONS ON CLINICAL RESEARCHES

Asım HOCAOĞLU
Turkish Medicine and Medical Device Agency, TÜRKİYE

The development of new treatments against diseases is only possible with clinical trials. However this struggle may be lead to abuses that acts endangering human dignity, to guarantee the dignity of the volunteers who participated in the research and also believed that both individuals and volunteers are needed to respect as a member of the human kind, there are made various legal regulations at international and national level.

In this presentation, these regulations will be referred and also aimed to give information about biomedicine agreement, the Declaration of Helsinki and the Turkish Criminal Law Article 90.
