EDITOR IN CHIEF

Prof. Dr. Mustafa Naziroğlu,
Department of Biophysics and Neurosciences,
Medical Faculty, Suleyman Demirel University,
Isparta, Turkey.
Phone: +90 246 211 36 41, Fax:+90 246 237 11 65
E-mail: mustafanaziroglu@sdu.edu.tr

Managing Editors

Kenan Yıldızhan and Yener Yazgan
Department of Biophysics, Medical Faculty,
Suleyman Demirel University, Isparta, Turkey.
E-mail: biophysics@sdu.edu.tr

Editorial Board

Neuronal Membranes, Calcium Signaling and TRP Channels

Alexei Tepikin, University of Liverpool, UK.
Jose A. Pariente, University of Extremadura,
Badajoz, Spain.
James W. Putney, Jr. NIEHS, NC, USA.
Laszlo Pecze, University of Fribourg, Switzerland.
Stephan M. Huber, Eberhard-Karls University,
Tubingen, Germany.

Neuroscience and Cell Signaling

Denis Rousseau, Joseph Fourier, University,
Grenoble, France.
Makoto Tominaga, National Institute for Physiological
Sciences (NIPS) Okazaki, Japan.
Ömer Çelik, Süleyman Demirel University, Turkey.
Ramazan Bal, Gaziantep University, Turkey.
Saeed Semnanian, Tarbiat Modares University,
Tehran, Iran.
Yasuo Mori, Kyoto University, Kyoto, Japan.

Antioxidant and Neuronal Diseases

Suresh Yenugu, Osmania University, Hyderabad, India.
Süleyman Kaplan, Ondokuz Mayıs University,
Samsun, Turkey.
Özcan Erel, Yıldırım Beyazıt University,
Ankara, Turkey.
Xingen G. Lei, Cornell University, Ithaca, NY, USA.
Valerian E. Kagan, University of Pittsburg, USA.

Antioxidant Nutrition, Melatonin and Neuroscience

Ana B. Rodriguez Moratinos, University of
Extremadura, Badajoz, Spain.
Cem Ekmekcioglu, University of Vienna, Austria.
Peter J. Butterworth, King's College London, UK.
Sergio Paredes Department of Physiology, Madrid
Complutense University, Spain.

AIM AND SCOPES

Journal of Cellular Neuroscience and Oxidative Stress is an online journal that publishes original research articles, reviews and short reviews on the molecular basis of biophysical, physiological and pharmacological processes that regulate cellular function, and the control or alteration of these processes by the action of receptors, neurotransmitters, second messengers, cation, anions, drugs or disease.

Areas of particular interest are four topics. They are;

A- Ion Channels (Na⁺- K⁺ Channels, Cl⁻ channels, Ca²⁺ channels, ADP-Ribose and metabolism of NAD⁺, Patch-Clamp applications)

B- Oxidative Stress (Antioxidant vitamins, antioxidant enzymes, metabolism of nitric oxide, oxidative stress, biophysics, biochemistry and physiology of free oxygen radicals)

C- Interaction Between Oxidative Stress and Ion Channels in Neuroscience

(Effects of the oxidative stress on the activation of the voltage sensitive cation channels, effect of ADP-Ribose and NAD⁺ on activation of the cation channels which are sensitive to voltage, effect of the oxidative stress on activation of the TRP channels in neurodegenerative diseases such Parkinson's and Alzheimer's diseases)

D- Gene and Oxidative Stress

(Gene abnormalities. Interaction between gene and free radicals. Gene anomalies and iron. Role of radiation and cancer on gene polymorphism)

READERSHIP

Biophysics	Biochemistry
Biology	Biomedical Engineering
Pharmacology	PhysiologyGenetics
Cardiology	Neurology
Oncology	Psychiatry
Neuroscience	Neuropharmacology

Keywords

Ion channels, cell biochemistry, biophysics, calcium signaling, cellular function, cellular physiology, metabolism, apoptosis, lipid peroxidation, nitric oxide, ageing, antioxidants, neuropathy, traumatic brain injury, pain, spinal cord injury, Alzheimer's Disease, Parkinson's Disease.

3rd International Brain Research School

The congress organization committee wishes thanks to the sponsors below

3rd International Brain Research School

Abstract Book

of

3rd International Brain
Research School

25 June – 1 July 2018

Isparta, Turkey

with collaboration of
Cellular Neuroscience
and Oxidative Stress Society
& Neuroscience Research Center,
Süleyman Demirel University

3rd International Brain Research School

[Organization Committee]

Organization Chairman

Prof. Dr. Mustafa NAZIROĞLU

*Department of Biophysics, School of Medicine
Suleyman Demirel University, Isparta, Turkey*

Organization Vice Chairman

Assoc. Prof. Dr. Ömer ÇELİK

*Department of Biophysics, School of Medicine

[CONTENTS]

Speakers

Speak No. 1. Pathophysiology of cation channels in pain: Focus on TRP Channels. <i>Mustafa NAZIROĞLU</i>	776
Speak No. 2. Calcium imaging techniques in cell lines. <i>Laszlo PECZE</i>	777
Speak No. 3. Western-blot, PCR and immunofluorescence analysis in mitochondrial biogenesis studies. <i>Denis ROUSSEAU</i>	778
Speak No. 4. Intravenous NAD ⁺ effectively increased the NAD metabolome, reduced oxidative stress and inflammation, and increased expression of longevity genes safely in elderly humans. <i>Nady BRAIDY, James CLEMENT, John STURGES, Yue LIU, Anne POLJAK, Perminder SACHDEV</i>	779
Speak No. 5. Voltage gated sodium channels and epilepsy. <i>Simon HEBEISEN</i>	780

3rd International Brain Research School

Oral Presentations

- Oral Presentation 1.** Traumatic brain injury models in rats.
Kemal ERTİLAV781
- Oral Presentation 2.** Neurodegenerative disease and microbiota.
Mustafa GÜZEL, Doğan AKDOĞAN, Orhan AKPINAR.....782
- Oral Presentation 3.** The gut-brain axis: interactions between microbiota and nervous systems.
Orhan AKPINAR.....783
- Oral Presentation 4.** Roles of dexmedetomidine and calcium signaling in cerebral ischemia: Focus TRP channels
Haci Ömer OSMANLIOĞLU784
- Oral Presentation 5.** Depression models in experimental animals.
Arif DEMİRDAŞ785
- Oral Presentation 6.** TRPV1 channel is a potential drug discovery channel for epilepsy.
Ahmet ÖZŞİMŞEK786
- Oral Presentation 7.** Cerebral ischemia models in rats.
Zeki Serdar ATAİZİ787
- Oral Presentation 8.** Involvement of TRP channels on fibromyalgia-induced pain.
Atalay DOĞRU.....788
- Oral Presentation 9.** Involvement of Thermo TRP channels on chemotherapeutic agents-induced peripheral pain.
Mustafa Kemal YILDIRIM.....789
- Oral Presentation 10.** Role of desflurane on oxidative stress in neuroscience.
Mustafa KÜTÜK, Gökçen GÖKÇE.....790
- Oral Presentation 11.** Effects of cell phone (900 and 1800 MHz) and Wi-Fi (2450 MHz) frequencies on oxidative stress in laryngeal mucosa.
Sinem GÖKÇE KÜTÜK791
- Oral Presentation 12.** Role of melatonin on oxidative stress in traumatic brain injury.
Yener AKYUVA792

3rd International Brain Research School

Poster Presentations

- Poster No. 1.** Dysbiosis of gut microbiota and Alzheimer's Disease.
Orhan AKPINAR793
- Poster No. 2.** Human gut microbiota and Parkinson Disease.
Mustafa GÜZEL, Orhan AKPINAR.....794
- Poster No. 3.** Experimental Parkinson's disease models.
Eda Duygu IPEK, Hulki BASALOGLU795
- Poster No. 4.** Effects of alpha lipoic acid on TRPV1 cation channel in dorsal root ganglion.
of diabetes-induced rats
Betül YAZĞAN, Yener YAZĞAN, Mustafa NAZIROĞLU.....796

 **Poster No. 2**
Human gut microbiota and Parkinson Disease**Mustafa GÜZEL¹, Orhan AKPINAR²**¹Department of Medical Microbiology, Maltepe Medical Center, Istanbul, Turkey²Department of Medical Microbiology, Health Sciences Institute, Suleyman Demirel University Isparta, Turkey

Human gut microbiota (GM) has now been accepted as a potential modulator of human biology. Although new to the world of science, GM's impact on brain and behavior has drawn great attention around the globe. Studies have now proven that GM can directly or indirectly modify brain neurochemistry via various mechanisms like neural, immune and endocrine. The intestinal microbiota influence neurodevelopment, modulate behavior, and contribute to neurological disorders. This presentation is an overview of recent findings regarding the GM-brain axis in PD (Braniste et al. 2014; Sampson et al. 2016)

Parkinson disease (PD) is the second-most common neurodegenerative disorder. PD patients show alpha-synuclein deposits and neurodegeneration in the enteric nervous system as well as breakdown of the mucosal barrier, bacterial invasion, and mucosal inflammation in the colon. Alterations in GM and increased gut permeability may influence PD pathophysiology via epigenetic processes that alter α Syn regulation (Matsumoto et al. 2010).

Sampson et al. (2016) suggest that GM are required for the hallmark motor and GI dysfunction in a mouse model of PD, via postnatal gut-brain signaling by microbial molecules that impact neuroinflammation and α Syn aggregation. They propose that GM regulate movement disorders and suggest that alterations in the human microbiome represent a risk factor for PD. GM do not only affect gut physiology, but there is also an intense bidirectional interaction with the brain influencing neuronal activity, behavior, as well as levels of neurotransmitter receptors, neurotrophic factors, and inflammation. Recently, gut microbiome alterations in PD subjects and a connection between GM and motor- as well as non-motor symptoms have been described

(Sampson et al. 2016; Parashar and Udayabanu 2017)

Key words; Parkinson disease; Gut microbiota; gut-brain signaling.
