ICONARP INTERNATIONAL JOURNAL OF ARCHITECTURE AND PLANNING

ICONARP as an e-journal considers original articles, research briefs, book reviews and viewpoints in peer-reviewed. ICONARP is an exciting new venture occurred with experiences, theoretical approaches, critical and empirical studies in the field of architecture and planning.

SCOPE and AIM

The journal aims to be a platform for the studies of design, education and application and has a goal to be a bridge in between traditional/modern, east/west, local/global in the disciplines of Architecture / Planning.

Architecture and Planning, as two interconnected fields, are strongly affected by other disciplines such as fine art, urban design, philosophy, engineering, geography, economics, politics, sociology, history, psychology, geology, information technology, ecology, law, security and management. However, there are no academic journals which specifically focus on the connections of architecture and planning with other social fields. **ICONARP** aims to fill that gap. Our scope is to provide a suitable space for theoretical, methodological and empirical papers, which use global and local perspectives together, in architectural and urban studies.

EDITORIAL

ICONARP began its broadcast life as peer-reviewed faculty journal in the field of international architecture and planning and now it is the third issue.

ICONARP is born and now growing up with this new issue. We appreciate everyone with effort in the third issue of our journal which has the goal to explore the relationship of Architecture and Planning with other disciplines they affect or are affected by and be a bridge between them. "Accessible Cities and Barrier-Free Spaces" has become the main concept of this issue.

The subject of ICONARP's fourth issue which will be published in December is determined as "**Innovative Approaches In Architecture and Planning**". We look forward to your contributions with your scientific studies until 5th September 2014.
