

Ethical Issues:

Author(s) are expected to consider some ethical issues before, during and after their scientific works such as voluntariness, privacy, ethnic, racial and cultural sensitivities of the survey participants and originality of the work. The author(s) should ensure that they have written entirely original works, and if the authors have used the work and/or words of others that this has been appropriately cited or quoted. Plagiarism in all its forms constitutes unethical publishing behavior and is unacceptable.
