

Journal of the Turkish Chemical Society, Section A: Chemistry (JOTCSA)

e-ISSN: 2149-0120

A biannual, open-access chemical journal, hosted by Dergipark

(Published, in English, in every February, June, and October)

Editorial Board (sorted by the lastnames)

Prof. Dr. Göktürk, Sinem (Physical Chemistry, Marmara University, Turkey)

Prof. Dr. Kadiođlu, Yücel (Electrochemistry, Atatürk University, Turkey)

Prof. Dr. Karagözler, A. Alev (Biochemistry, Adnan Menderes University, Turkey)

Prof. Dr. Köse, Dursun Ali (Inorganic Chemistry, Hitit University, Turkey)

Prof. Dr. Küçükbay, F. Zehra (Analytical Chemistry, İnönü University, Turkey)

Prof. Dr. Küçükbay, Hasan (Organic Chemistry, İnönü University, Turkey) Editor-in-Chief

Assoc. Prof. Dr. Sevim, Altuđ Mert (Editor, Istanbul Technical University, Turkey)

Prof. Dr. Taşdelen, M. Atilla (Polymer Chemistry, Yalova University, Turkey)

Prof. Dr. Yalçın, Esin A. (Computational Chemistry, Ankara University, Turkey)

Address: Halaskargazi Str. Uzay Apt. No: 15/8, 34373 Harbiye, Istanbul/Turkey.

Fax: +90 212 231 70 37

E-mail: jotcsa@turchemsoc.org

Website: <https://dergipark.org.tr/jotcsa>

(*)JOTCSA is a peer-reviewed publication of the Turkish Chemical Society.

(*)The ideas outlined by the authors cannot be attributed to the journal management nor the editorial board.

Aim and Scope of the Journal

The journal will publish, after a peer-reviewing process, the following:

a) Research articles,

b) Review articles,

c) Letters to the editor.

If requested, the journal will also publish the following, without committing a peer review:

d) Book reviews,

e) Thesis abstracts.

The journal's scope will include, but not limited to, the following disciplines of chemistry:

i) Analytical chemistry,

ii) Biochemistry,

iii) Computational chemistry,

iv) Electrochemistry,

v) Inorganic chemistry,

vi) Organic chemistry

vii) Physical chemistry,

viii) Polymer chemistry.

ETHICAL GUIDELINES

Guidelines for the Editors

An editor (editors, associate editors, etc.) should provide impartial consideration to all manuscripts offered for publication, judging each on its particular feature without regard to race, religion, nationality, sex, seniority, or institutional affiliation of the author(s). An editor should review and treat a manuscript submitted for publication with all reasonable speed. An editor takes the sole responsibility for accepting or rejecting a manuscript for publication. An editor may seek assistance on a manuscript from specialists chosen for their expertise and fair judgment. An editor should not reveal any information about the manuscript under consideration to anyone other than the author and designated reviewers until after the evaluation process is complete. An editor should respect the intellectual independence of authors.

Authors

Our journal considers a person as an author who is responsible at least for a part of the work. Authors should be able to explain the problem in study in a deep manner. For our journal, all authors are responsible for the content they submitted. The corresponding author is responsible for the agreement of all the authors and to keep them informed about the submission process since first submission of their manuscript. He/she is responsible for providing the license to publish, in case of acceptance, on behalf of all the authors. Our journal assumes that submitting the paper implies in total agreement from all the authors. For manuscripts with more than 8 authors, all the authors should provide a declaration specifying what was their contribution to the manuscript. It is not acceptable for JOTCSA to consider for publication anything that was previously published, neither entirely nor partly in other journals. Anything sent to our journal must not be under analysis by anywhere else. Simultaneous submissions to JOTCSA and any other journal, is considered a major conduct flaw, and all the authors will be definitely banned, and all their previous publications in JOTCSA will be publicly retracted. Plagiarism and self-

plagiarism will be treated in the same way. Multiple manuscripts, dealing with closely related subjects and/or variables are discouraged as long as they could figure in a single paper.

Reviewers

JOTCSA invites peers to review its submissions, relying on their expertise, curricula, and their will to review them as volunteers. By accepting to review a manuscript, the reviewer commits himself to do so in due time. Delays are extremely negative to the review process and makes it last much longer than it should. When a reviewer is requested, he/she is gently asked to answer the invitation e-mail, informing if he/she is willing or not willing to review the manuscript. It is a gesture of politeness, and it avoids delays too. By accepting to review a manuscript, the reviewer declares that no conflicts of interests do exist, and he/she is doing his/her revision for the wealth and progress of Science. Those reviewers who answer our requests, agreeing or not, and those who respect the deadlines, are scored positively, and eventual submissions they could send to JOTCSA will be treated with priority. The online version of this declaration can be viewed at <https://dergipark.org.tr/journal/1021/file-manager/14420/download>.

9	Süleyman Akocak, Nabih Lolak, Muhammed Tuneg, Mehmet Boga	Antioxidant, acetylcholinesterase and butyrylcholinesterase inhibition profiles of histamine Schiff bases Histamin Schiff bazlarının antioksidant, asetilkolinesteraz ve butirilkolinesteraz inhibisyon profilleri	157-164
10	HUSSEIN KEHINDE OKORO, Oluwaseyi Ayika, Adedibu Tella, Jane Ngila	METAL-ORGANIC FRAMEWORKS (MOFs) DERIVED FROM CARBOXYLATE LIGAND AS POTENTIAL MATERIALS FOR REMEDIATION OF Cu (II) AND Pb (II) FROM AQUEOUS SOLUTION Sulu çözeltiden Cu(II) ve Pb(II) iyonlarının islah edilmesi için potansiyel malzemeler olarak karboksilat ligandlardan türeyen metal organik yapılar (MOF)	165-176
11	Aysema SAYIK MEHAN, Ebru SENTURK, Emel MATARACI KARA, Ayse Serguzel YUSUFOGLU	Synthesis, E/Z isomerisation and antimicrobial studies of different structured novel ketone derivatives. Farklı yapıları yeni keton türevlerinin sentezi, E/Z izomerizasyonu ve antimikrobiyal çalışmaları	177-188
12	Pınar Şen, Sevgi Kansız, Necmi Dege	Synthesis, molecular structure, Hirshfeld surface analysis, spectroscopic and computational studies (DFT) of 6,6'-((1E,1'E)-(1,2-phenylenebis(azanylylidene))bis(methanylylidene))bis(2-(tert-butyl)-4-methylphenol) 6,6'-((1E,1'E)-(1,2-fenilenbis(azaniliden))bis(metaniliden))-bis(2-(tert-butil)-4-metilfenol bileşiğinin sentezi, moleküler yapısı, Hirshfeld yüzey analizi, spektroskopik ve hesaplamalı çalışmaları (DFT)	189-200
13	Aysecik Kacmaz	Synthesis of (Thio)substituted -1,3-Butadienes and -Butenyynes (Tiyo)sübstitüe-1,3-butadienlerin ve buteninlerin sentezi	201-206
14	Elif ŞENKUYTU, Elif Okutan	Novel probes for selective fluorometric sensing of Fe(II) and Fe(III) based on BODIPY dyes	207-216

		Fe(II) ve Fe(III) esaslı BODIPY boyar maddelerinin seçimli fluorometrik hassaslaştırılması için yeni problemler	
15	Sabriye Perçin ÖZKORUCUKLU, Besnik Uka, Gizem Yıldırım Baştemur	Voltammetric Analysis of Cephalexin and Cefazoline in Pharmaceutical Formulation and Biological Samples Farmasötik formülasyonlarda ve biyolojik örneklerde cefaleksin ve sefazolinin voltammetrik analizi	217-224
16	Meryem Kalkan Erdoğan, Meral Karakışla	Simultaneous Deposition of Poly(o-anisidine) and Noble Ag Particles on Wool Fabric and The Evaluation of Its Performance as Catalyst in Dye Reduction Yün elyaf üzerinde yeni Ag parçacıklarının poli(o-anisidin) ile beraber biriktirilmesi ve boyar madde azaltılması için katalitör olarak performansının değerlendirilmesi	225-236
17	Rachid Hsissou, Mohamed Berradi, Mehdi El Bouchti, Ahmed El Harfi	Morphological and rheological study of the epoxy polymer and their nanocomposite (NGTHTPTBAE/MDA/TSP) crosslinked by methylene dianiline and formulated by trisodium phosphate Epoksi polimer ve nanokompozitinin (NGTHTPTBAE/MDA/TSP) metilen dianilin ile çapraz bağlanması ve trisodyum fosfat ile formüle edilmesi, morfolojik ve reolojik çalışmaları	237-244
18	Dr. Gokhan Acik	Study on the Synthesis and Characterization of Antibacterial Polystyrenes Antibakteriyel polistirenlerin sentezi ve karakterizasyonunun çalışılması	245-252
19	Mert Ogun KARATAŞ, Adem Ergün	Synthesis, Characterization, and Carbonic Anhydrase Inhibitory Properties of Silver(I) Complexes of Benzimidazole Derivatives Benzimidazol türevlerinin gümüş(I) komplekslerinin sentezi, karakterizasyonu ve karbonik anhidraz inhibitör özelliklerinin incelenmesi	253-260
20	Kinyas Polat, Mürüvvet Yurdakoç	Removal of Malachite Green from Waste Waters by Bentonite Based Photocatalyst Technology Bentonit esaslı fotokatalizör teknolojisi ile atık sulardan malahit yeşilinin giderilmesi	261-270

Editorial, JOTCSA 6(2), 2019

We have launched our new issue, namely JOTCSA 6(2), 2019, just a few days ago and provided you with this editorial document. In this issue, twenty articles were published and as everytime, they are free to download. We wish our readers to cite our works, so that our journal can elevate further into the main event. Queries may be placed to myself at hasan.kucukbay@inonu.edu.tr or to our managing editor at jotcsa@turchemsoc.org.

See you in the next issue...

Kind regards,

Prof. Dr. Hasan KÜÇÜKBAY

Editor-in-chief, JOTCSA
