EDITORIAL

Our dear readers,

We are happy and excited to have published the 3rd issue of our journal “Journal of Medicine and Palliative Care”, which started its publication life as of March 2020, during this period when continue to fight the Covid-19 outbreak. Our journal aims to convey to you comprehensive and up to date studies on every field of health sciences. We are making a great effort as a team to increase the scientific quality of our journal day by day. In this issue of our journal, there are four research articles and two review articles, each unique in their own field, which we think will attract your attention. One of the research article is about *Teucrium polium L.* plant which grown in Turkey describing the impact of HepG2 cell line, in another study about that predicting the severity of the disease in ulcerative colitis remains non-invasive markers on the evaluation of hematologic parameters. The other two articles are related to genetic research, whose importance is increasing day by day in our country. One of the review article deals with the relationship between psychotropic drugs and hyponatremia, while the other review deals with the role of nursing in palliative care. On this occasion, we would like to express our gratitude to all our readers and colleagues who have contributed to the development process of our journal and wish them well-being.

Sincerely yours,

Assist. Prof. Yasemin ASLAN
Associate Editor

EDİTÖRDEN

Değerli okuyucularımız,

Mart 2020 itibariyle yayın hayatına başlamış olan dergimiz “Journal of Medicine and Palliative Care”in, Covid-19 salgınına karşı mücadelemizin devam ettiği bu dönemde üçüncü sayısını çıkarmış olmanın mutluluğunu ve heyecanını yaşıyoruz. Dergimiz sağlık bilimlerinin her alanıyla ilgili geniş kapsamlı ve güncel çalışmaları sizlere ulaştırmayı hedeflemektedir. Dergimizin bilimsel kalitesini her geçen gün daha da yükseltmek amacıyla ekip olarak büyük bir çaba içerisindeyiz. Dergimizin bu sayısında ilginizi çekeceğini düşündüğümüz her biri kendi alanında özgün dört araştırma makalesi ve iki derleme çalışma bulunmaktadır. Araştırma makalelerinden biri Türkiye’de yetişen *Teucrium polium L.* bitkisinin HepG2 hücre hattı üzerindeki etkisini anlatırken, diğer bir çalışmada ülseratif kolitte hastalığın şiddetini öngörmeye non-invaziv belirteçler olarak hematolojik parametrelerin değerlendirilmesi üzerinde durmaktadır. Diğer iki çalışma ülkemizde önemi her geçen gün artan genetik araştırmalarla ilgilidir. Derleme çalışmalardan biri psikotropik ilaçlar ve hiponatremi ilişkisini ele alırken, diğer çalışma palyatif bakımda hemşireliğin rolüyle ilgilidir. Bu vesileyle dergimizin gelişim sürecine emek veren bütün okuyucularımıza ve meslektaşlarımıza teşekkürlerimizi sunar, esenlikler dileriz.

Saygılarımla,

Dr.Öğr. Üyesi Yasemin ASLAN
Yardımcı Editör

Original Article / Özgün Makale

Türkiye’de yetişen *Teucrium polium* L. bitkisinin HepG2 hücre hattı üzerindeki etkisi..... 49
*Effect of *Teucrium polium* L. plant on HepG2 cell line grown in Turkey*

Ülseratif kolitte hastalığın şiddetini öngörmeye non-invaziv belirteçler olarak hematolojik parametrelerin değerlendirilmesi..... 53
Evaluation of hematological parameters as non-invasive markers in predicting the severity of the disease in ulcerative colitis

Otoimmün tiroid hastalıklarında CTLA-4 geninin *in silico* analizinin değerlendirilmesi 58
*Evaluation of the *in silico* analysis of CTLA-4 gene in autoimmune thyroid diseases*

Determination of malnutrition status in palliative care patients 64
Palyatif bakım hastalarında yetersiz beslenme durumunun belirlenmesi

Review / Derleme

Psikotropik ilaçlar ve hiponatremi ilişkisi: bir derleme..... 71
The relationship between psychotropic drugs and hyponatremia: a review

Palyatif bakıma bakış ve hemşireliğin rolü 76
View to palliative care and the role of nursing
