

FROM THE EDITOR

Dear Acta Orthopaedica et Traumatologica Turcica readers,

We are pleased to bring you the third issue of our journal. You will find several studies with gripping topics in this issue. Following initiation of a new review system, you have probably noticed the significant time reduction in the review of your articles. I would like to thank our dear reviewers, associate editors and proofreading team for their assistance in this matter. We are pleased to have AOTT attain the position it deserves with their superior effort and collaboration. The increase in the number of submissions to our journal within the last six months is an indicator of this quality. I would like to thank you, our valuable readers, for your confidence and interest.

Seven experimental studies have been included in this issue. When compared with case reports, original and experimental studies have priority both in the acceptance and publishing stages in our journal. In addition, we, the Editorial Board, place stress on the number of Level 1 studies included in our journal. We welcome your submissions of such prospective, randomized, double-blind studies in our journal and hope to include even more in upcoming issues.

Best regards,

Prof. Dr. Mehmet Demirhan
AOTT Editor-in-Chief
