In order for any article to be published in Folklor/Literature, it should not have been previously published or accepted to be published elsewhere.

Referees' Evaluation of Papers

Articles forwarded to Folklor/Literature are first reviewed by the Editorial Board in terms of journal's publishing principles. Those which are found unsuitable are returned to their authors to be corrected. Academic objectivity and scientific quality are considered of paramount importance. Those considered acceptable are initially referred to two referees who are well-known for their works in relevant fields. Names of the referees are kept confidential and referee reports are safe-kept for two years. For publication of articles, two positive reports are required. In case one referee report is negative while the other is favorable, the article may be forwarded to a third referee for further evaluation or alternatively the board, based on the contents of the reports may feel confident to make a final decision. The authors are to consider the criticism, suggestions and corrections offered by the referees and by the editorial board. If they disagree, they are entitled to counter present their views and justifications. Final decision rests with the editorial board.
