Ahmet Ural

Here we are with the second issue of Mucosa after excited and hopeful start. Launching Mucosa is welcomed with great interest and support of researchers, nationally and internationally, from all disciplines related mucosal tissues. We thank you all for your kind and stimulating feedbacks.

This second issue of Mucosa features five scientific papers. An excellent paper, by Tarkan Karakan, reviews gut microbiota and probiotics. The valuable original articles, by Cevik et al and Taskin et al, address the possible role of melanocytes in the inner ear on hearing functions in patients with childhood vitiligo, and toluidine blue application to detect the dysplastic changes in patients with oral lichenoid lesions, respectively. Two remarkable cases, by Daye et al and Dasbasi et al, draw attention to one of the imitator of pemphigus and successful treatment of focal epithelial hyperplasia in a child, respectively.

We hope you will enjoy this second issue, and that these articles again stimulate your attention on mucosa. We invite you to submit your excellent papers for publication in Mucosa.

With warmest regards,

Savas Yayli
