

Aims and Scope

Aurum Journal of Health Sciences (AJHS – A. J. Health Sci.) is an international open access platform for basic, applied, theoretical and clinical studies in health sciences. AJHS publishes double blind peer-reviewed research articles, short reports, case reports, invited reviews and letters to the editor. AJHS is published bi-annually both in printed and electronic version. AJHS is a multidisciplinary journal on health sciences and accepts manuscripts on dental, medical, health services and pharmaceutical studies. The manuscripts linking different disciplines of health sciences will be given a priority in the journal.

Liabilities and Responsibilities of Editors

AURUM editors are obliged to be accountable for all kinds of activities they engage within the context of publishing the journal. Their main goal is set to respond the need of readers and authors while enhancing the academic performance of the journal. It is their duty to support freedom of opinion and ensure the reliability of the academic content. Considering the financial challenges in publishing sector, the editors are obliged to exclude impacts of any commercial concerns on AURUM not to sacrifice from its intellectual and ethical standards. They accept in advance to publish any kind of corrections, refutations and excuses when required. The responsibility towards readers is a sensitive issue where the editors should inform about the funder of particular research or other academic work. If the financial supporters of particular research have any impact on a scholarly work, the reader must be informed. Editors' action to admit or reject a scholarly work must be free of subjective criterion but based on objective standards related to its uniqueness/originality and relevance to the research areas of AURUM. The process of receiving application shall be fully democratic where all applications to be considered unless major errors are observed. Once an author receives an acceptance of publishing from AURUM his/her right cannot be withdrawn in case of an editor change within the process. The authors shall be given an opportunity to initiate an appeal process against any editorial discretion. As editors should offer a guidance of preparing the manuscripts, AURUM stands behind it's published "style guide" and preserves it's right to make revisions.

Editorial

We are pleased to announce the second issue of Aurum Journal of Health Sciences (AJHS -A. J. Health Sci.) has been published. It consists of a case study from dentistry, a research paper to investigate antimicrobial effect of an extract, a research paper on essential oil composition of a plant, and a review article discussing the status of rare diseases and related orphan drugs in the world and Turkey. February 29 is celebrated as Rare Disease Day. The aim of this celebration is to raise awareness in society, and encourage further studies in the scientific field. It is known that although the name of the diseases is rare, their incidence is not rare. 6-7 million people only in Turkey are affected by these diseases. Therefore, supporting the researches in this field is also substantial in our country.

AJHS is published tri-annually as a peer-reviewed health sciences journal and aims to provide a platform for health science research with interdisciplinary discussions. Our vision is to contribute to publishing a journal taken part in national/international indexes. I received this mission from Assoc. Prof. Dr. Kaan Polatođlu, who brought the journal to life with great effort, and I became the new chief editor. The way to be a significant journal in scientific fields begins with small steps. We can make this newborn journal grow into adulthood together. We are looking forward to hearing from our esteemed academicians to share their ideas, works and joint studies with us.

I would like to thank all of our editors who contributed to the issue of our journal, and to thank our referees and all those who contributed to the evaluation of articles. I wish a successful year for AJHS.

Gaye Hafez, PhD

Editor-in-Chief
