

# SÜRELİ YAYINLAR

## TRANSACTIONS OF THE INSTITUTION OF MINING AND METALLURGY

JANUARY-APRIL 1995

### SECTION A

A1. Engineering geomorphological mapping and opencast mining in unstable mountains- a case study  
G.J.Hearn

A19. Probabilistic risk analysis of slope stability  
A.P. Whittlestone et al.

A25. Assessment of risk from rockfall from active and abandoned quarry slopes  
M.E. Robotham, H. Wang and G. Walton

A34. Analysis and management of financial risks arising from ground conditions  
I.L. Whyte

A41. Grown-pillar risk assessment-planning aid for cost-effective mine closure remediation  
T.G. Carter and R.J. Miller

A5 8. Dragline-bench instability risk management  
R.J. Thompson

### Technical notes

A67. Inclusion of risk assessment in open pit design and scheduling  
B. Denby and D. Schofield

A71. Risk-cost-benefit analysis for support design in burst-prone mines  
R.K. Brummer and P.K. Kaiser

A76. Monitoring airborne dust from quarrying and surface mining operations  
J.R. Merefieft et al.

### SECTION B

B2. Introduction: "Economic geology in Europe and beyond II"  
P.R. Simpson

B1. Broken Hill area, Australia, as a Proterozoic fold and thrust belt; implications for the Broken Hill base-metal deposit  
S.H. White et al.

B18. Ni-Cu-PGE deposits of Nonl'sk region, Siberia: their formation in conduits for flood basalt volcanism  
A.J. Naldrett et al.

B37. Interaction between thermally convecting basinal brines and organic matter in genesis of Upper Mississippi Valley zinc-lead district  
C.S. Spirakis and A.V. Heyl

B46. Geological setting of iron deposits of Hekimhan Province, Malatya, central Anatolia, Turkey

Henrik Stendal, Taner Ünlü and Jens Konnerup-Madsen

B55. Lower Cretaceous Pb-Zn ores of Cantabria, northern Spain: new considerations based on petrological and geochemical evidence

Manuel Bustillo and Salvador Ordonez

B66. Tectonic setting, deep faults and mercury mineralization at Almaden, Spain, and Nikitovka, Ukraine: affinities and contrasts.

H. de Boorder et al.

Technical note

B80. Metasediment-hosted epithermal Sb-(Au) mineralization in central Spain: role of hidden Hercynian granitoids

L. Ortega, R. Oyarzun and M. Gallego

## SECTION C

C1. Method for incorporation of shape characterization into cone crusher model

C. Apling and N. B. Barrett

C11. Fracture behaviour of three Australian iron ores

D. Dukino et al.

C20. Electrochemical removal of lead from Aluminium using fused salts.

Tailoka, G. Zhao and D. J. Fray

C25. Liberation of accessory minerals from various rock types by electric-pulse disintegration-method and application

S. Rudashevsky et al.

C30. Prediction of performance of 76-mm compound autogenous cyclone at different outlet diameters

Suresi, R. Venugopal and T. C. Rao

## Technical notes

C3 7. Hydrocyclone investigation and modelling at medium feed solids concentration of mixed minerals.

A. Doheim, M. N. M. Ahmed, S. A. Sayed

C45 Flotation of pyrite and arsenopyrite alkaline pH

A. Diaz and R. J. Gochin

MAY-AUGUST 1995

## SECTION A

A79. Risk assessment applied to coal tonnage estimation in the United Kingdom

W. Hatton and M. K. G. Whateley

A87. Development of seismic risk assessment method for application to rockburst-prone sites in deep-level South African gold mines

R. D. Stewart

A96. Risk-based approach to setting of flyrock 'danger zones' for blast sites

P. A. Davies

A101. Prediction of drill-bit performance using multi-variable linear regression analysis

A. Ersoy and M. D. Waller

A115. New generalized model of observed ore value distributions

H. S. Sichel, C. E. Dohm and W. J. Kleingeld.

A124. Intelligent drilling control  
M.D.Waller and P.J.Rowsell

## SECTION B

B87. Cu-Ni-PGE mineralization hosted by boninitic gabbro, central Norwegian Caledonides: character and tectonic setting  
Rune B.Larsen and Tor Grenne

B99. Nature of gold mineralization at Mule Canyon, Lander Vouny, Nevada, U.S.A.  
Thomas J. Serenko

B111 Lithostratigraphic and structural controls on distribution of As and Au in southwest Southern Uplands Scotland.  
P.Stone et al.

B121. Hydrothermal alteration associated with sediment-hosted Rooiberg tin deposits, South Africa  
A.Rozendaal, J.E.Misiewicz and R.Scheepers

B136 Paragenesis of hydrocarbon metalliferous and other fluids in Newark Group basins, eastern U.S.A.  
J.Parnell and B.Manşon.

B145. Characterization of fluid-flow systems for Irish lead-zinc deposits- contributions from mass balance.  
Helen Lewis, Gary D.Couples and Michael J.Russell.

## SECTION C

C51 Fused-salt electrorefining of bismuth-lead alloys in a recessed-channel cell.  
F.Tailoka and D.J.Fray

C59. Laboratory-scale smelting of copper anode slimes  
W.J.Rankin, G.G.Barbanite and D.R.Swinbourne

C70. Sintering reactions between a complex Chinese iron ore concentrate and Australian ores.  
C.E.Loo et al.

C81. Kinetics of reduction of metal values from fayalite-based slags-Part 1: reduction of nickel and copper  
B.S.Terry and C.L.Harris

C92. Kinetics of reduction of metal values from fayalite-based slags-Part 2: modelling of idealized slag-cleaning conditions  
B.S.Terry and C.L.Harris

CI02. Minimum recovery zone height in flotation columns from particle-bubble collision analysis  
Z.A.Zhou, Zhenghe Wu and J.A.Finch

## Technical notes

C107. Kinetics of Cu(II) and adsorption by *penicillium* sp.  
S P.Mishra and G.Roy Chaudhury

CI10. Reducing the iron content of kaolin from Milos, Greece, by a hydrometallurgical process  
S.G.Tsimas et al.

CI14. Extension of mathematical model of a crusher to an impactor  
H.Kanli and M.R.Smith

INTERNATIONAL JOURNAL OF  
SURFACE MINING RECLAMATION  
& ENVIRONMENT

VOL.9 NO.1 1995

1.Plane failure analysis of rock slopes:A  
reliability approach

H.Ş.B.Düzgün, M.Y.Yücecan &  
A. G. Paşamehmetoğlu

7. Applications of the equivalent annual cost  
concept in mining

Jean-Luc Collins & Raj.K.Singhal

11 Numerical analysis of the impact load of  
falling rock by using the Distinct Element  
Method

M.Ujihira, N.Takagai&K.Ogawa

19. Environmental risk assessment and  
international mineral development

Kelvin Dushnisky&Clem A:Pellettier

23.Optimizing mine life and design capacity

Mirosław M.Hajdasinski

31 Revegetation of an abandoned coal  
washing site

Matthew H.Pelkki, James  
M:Ringe&Donald H.Graves

3 5. Water table lowering to improve  
excavation performance and to reduce acid  
mine drainage

J.C.Koppe, J.F.Costa&O.Laurent Jr.

MINING ENGINEERING

JANUARY 1995

75.(Mis)use of Monte Carlo simulations in  
NPV analysis

G.A.Davis

80.RossShaft pillar project at the  
Homestake Mine

M.E.Poad, W.G.Pariseau and  
M.A.Laurenti

85. Least cost surface coal mining

J.Devon and D.L.Ewart, Jr.

89.TECHNICAL NOTE: Planning of  
support work in underground coal mines  
using MANSUPP

J.M.Dean and R.L.Grayson.

FEBRUARY 1995

173.Elimination of toxic factors in leachat  
to enhance biooxidation of sulfide ores

P.Rusin,J.Cassells,L.Quintana, R.Arnold  
andN.Chrisman

178. Alternative to parameterization in  
finding a series of maximum-metal pits for  
production planning

Q.Wang and H. Sevim.

139.Progress in scaling in underground  
mines

S.Planeta

188.DISCUSSION: New size laboratory  
ball mill for Bond Work Index  
determination

H.Nematollahi

## **MARCH 1995**

269. Alternatives to oxyacetylene metal cutting

M. Ryan

272. Selective spoil placement for the prevention of acid mine drainage formation

L.H. Michaud

276. Results of underground mine studies to assess diesel particulate exposures and control technologies.

T.F. Tomb and R.A. Haney

280. Ground penetrating radar for identification of mine tunnels and abandoned mine stopes

T. Fenner

## **APRIL 1995**

355. Applications of shallow, high-resolution seismic reflections to various mining operations

R.D. Miller and D.W. Steeples

362. Cable bolting for pillar recovery at the Magmont mine

S.R. Dismuke, J. Goris and W. Pariseau

366. Time-cost, trade-off analyses of longwall face transfers

C. Patrick and E. Topuz.

## **MAY 1995**

### **ANNUAL MINING REVIEW**

421 Mining overview

J.D. Morgan

423. Coal overview

B.D. Hong

427. Exploration overview

J. H. De Young and E.D. Attanasi

## **JUNE 1995**

561. Inflatable partitions for high-expansion foam generators

R.S. Conti.

567. Some observations on mineral properties and analytical reproducibility in geochemical samples

L. Borsch

570. Contribution of shield movement to airborne dust levels in longwall faces.

R. Srikanth, S.C. Suboleski, W. Miola and R.V. Ramani

575. TECHNICAL NOTE: Reducing respirable dust concentrations at mineral-processing facilities using total mill ventilation system

A.B. Cecala, E.D. Thimons and

G.Q. Klinowski.

## **JULY 1995**

### **1995 SME MEMBERSHIP DIRECTORY**

1. The 1995 Membership Directory of the Society for Mining, Metallurgy and Exploration, Inc.

18. Alphabetical listing of SME members

152. Geographic listing of SME members worldwide.

## **INDUSTRIAL MINERALS**

### **JANUARY 1995**

27. Austrian mineral majors Selected company profiles

37. The current and future use of minerals in the high performance coatings industry

11. Prospects for aluminosilicate brick production in Nigeria

47. IM Index July-December 1994.

### **FEBRUARY 1995**

23. Olivine Long live the evolution

33. North American GCC The finer, brighter side of life

49. Surface modification of mineral fillers

### **MARCH 1995**

27. Refractory bauxite Cut-price dynasty under threat

45. International bauxite alumina markets

51. Dutch mineral trade More to it than meets the eye.

### **APRIL 1995**

21. Calcined and tabular alumina. Cast iron performance

47. Titanium minerals outlook. India poised for strong growth

65. Processing for Profit Abstracts biographies

79. Minerals for technical ceramics In the premier league.

### **MAY 1995**

25. Feldspar and nepheline syenite Turkish delight in export sales

47. Talc for thermoplastics

63. Spanish industrial minerals and rocks Industries come of age

79. US frits and glazes Under pressure from imports.

### **JUNE 1995**

25. Welcome to South Africa

55. The future for acid-grade fluorspar in Europe

61. New Jameson Cell flotation of industrial minerals

71 Opportunity knocks in Norway

### **JULY 1995**

25. Barytes supply not at oil well

35. China's ceramics market Showing off in strength

39. China's kaolin resources A whistle stop tour

49. IM Index January-June 1995.

CIM BULLETIN

**JANUARY 1995**

25. Participation of the aboriginal community in the Canadian minerals industry:

D.L. Johnston, Cominco Ltd.

27. Changing the way we train;

F. Osmond and R. Kelly, Iron Ore Company of Canada

32. Toward a gender-free mining industry:

M. Phyllis Bray

36. Managing change and implementing total quality in the mining industry;

W. Trahan and J. Campbell, Coopers & Lybrand

40. Teachers in business: An Alberta initiative in education and industry partnership;

G. Espejo, Father Patrick Mercredi Community High School, and

D. Duncan, Syncrude Canada Ltd.

42. Dissolution kinetics and carbon adsorption for the cyanidation of gold ores in oxygen enriched slurry;

G. Q. Lui and W. T. Yen, Queen's University

49. Compilation of geology theses, 1991-1993. Part IIG-N: Abstracts of selected theses at Canadian Earth Science Departments;

W. Bleeker, Geological Survey of Canada and I. Cadieux, Consulting Geologist

62. Department of selected minor elements at the HBMS zinc pressure leach plant:

M. J. Collins, I. M. Masters, E. Özberk, Sherritt Inc., and B. D. Krysa and

G. J. Desroches, Hudson Bay Mining and Smelting Co., Limited

**FEBRUARY 1995**

29. Underground incentives-their development, application and effect at Brunswick No. 12 mine, Bathurst, New Brunswick;

R. G. Baker, Brunswick Mining and Smelting Corp. Ltd.

32. Potentiel du forage à l'aide des foreuses hydrauliques sur

S. Planeta et J. Paraszczak, Université Laval

38. Nouvel outil d'écouillage portatif et mécanisé pour des mines souterraines;

S. Planeta, Université Laval

43. South African hoisting systems with emphasis on Blair multi-rope hoists;

A. M. Girodo and S. N. Sparg, Dorbyl Heavy Engineering

50. Implementing Total Quality Management in an engineering environment;

B. A. Perry and A. Wichert

54. Sulphide ore/explosives exothermic reactions;

T. Steis and W. Evans, ICI Explosives Canada

67. QIT-Fer et Titane Inc.;

A. E. Grau, QIT-Ger et Titane Inc.

## MARCH 1995

87.The beneficiation of Canadian refractory silicate minerals -kyanite, silimanite and andalusite:

P.RAAndrexs. Resource Utuluzatuon Laboratory, CANMET

90.Performance improvements in industrial rod milling operations;

R.E.McIvor, Cleveland-Cliffs Inc

92.Gainsharing incentive plans and mining: An introduction; .

D.McDonald and R.Poulin, The University of British Columbia

95.Motor insulation considerations for variable speed AC drives;

RHRehder and M.E.Stutt

98.Friction bolt anchored wire rope for rock support in burst-prone ground;

D.D.Tannatn and PbKbKaiser, Laurentian University

105.Design of liner plate culverts for underground mining environment;

REI.Dur, R.Durr Engineering Limited, and GRDavidge, FalconbridgeLimited.

117.Development of a copper arsenate process for Inco's Manitoba Division;

C.L.Stewart, J.Budac.D.Wrana, Inco Limited, Thompson, and E.Krause and S.W.Laundry, Inco Limited, Missiassauga.

## APRIL 1995

34.Discount rates and risk assessment in mineral projects evaluations;

Lawrence Devon Smith, Kilborn Inc.

44.Evaluation of hazard from self-heating of sulphide rock;

F.Rosenblum and P.Spira, Centre de technologi Nofanda

50.Corporate considerations in mine decommissioning;

M.J.Brodie, Golder Associates Ltd.

55.Evaluation of cable bolt applications for Canadian underground mines;

RPoulin, R.Pakalnis, D.Peterson and J.Kalynchuk, The University of British Columbia,

19. Mining, the Environment and CIM; A. Oliver The Fisheries Act and the Canadian

21. Environmental Assessment Act; M. Comfort

22. Voluntary emissions reduction; Programs that work

27.Trade end environment; PPMs and natural resources: Wray Koepke, Mining Sector, Natural Resources Canada

31. The Whitehorse Mining Initiative: Positioning the industry for the 21st century; C.George Miller, The Mining Association of Canada

24Recent Canadian technology for the primary aluminum industry environment;

AJ.Plumpton

## MAY 1995

15. Target vectoring using lithogeo-chemistry: Applications to the exploration

for volcanic-hosted massive sulphide deposits:

Alan G. Galley, Geological Survey of Canada

28. Hoist rope improvements through thermoplastic enhancement;

Bill Parnell, Williams Operating Corporation

3 O. Canadian mining automation evolution: The digital mine en route to minewide automation;

Malcolm Scoble, Canadian Centre for Automation and Robotics in Mining, McGU University

38.A Guideline for tendon support design; Brian O'hearn, Northwest Territories Department of Safety and Public Services. and Doug Hanson, Douglyn Enterprises, Inc.

42. Station excavation into a production shaft;

P.Hickey, Ram Raising Limited, and A.Oliver, Dome Mines, Placer Dome Incorporated

46. Crusher and inclined conveyor system at Detour Lake Mine;

P.Hansman, Detour Lake Mine, Placer Dome Incorporated.
