## AIM AND SCOPE

Journal of Aviation (JAV) established in 2017. It is a peer-reviewed international journal to be of interest and use to all those concerned with research in various fields of, or closely related to, Aviation science. Journal of Aviation (JAV) aims to provide a highly readable and valuable addition to the literature which will serve as an indispensable reference tool for years to come. The coverage of the journal includes all new theoretical and experimental findings in the fields of Aviation Science or any closely related fields. The journal also encourages the submission of critical review articles covering advances in recent research of such fields as well as technical notes.

### The scopes include:

- Accounting
- Acoustics
- Aerospace communications
- Air cargo, logistics, and supply-chain management
- Air pollution
- Air traffic management and control
- Air transport policy, regulation, and law
- Airport planning and management
- Airworthiness, reliability, and safety
- Atmospheric flight mechanics
- Attitude dynamics
- Autonomous and unmanned air vehicles
- Big data and data mining
- Brand management
- Business management and strategy
- Combustion and fuels
- Complex systems
- Design and manufacturing
- Dynamics and control of large flexible space structures
- Economics and finance
- Electrical systems in air vehicles
- Electromagnetism and radar
- Environmental issues
- Flight mechanics
- Flight performance
- Fluid dynamics
- History of aviation
- Human and system interaction
- Human factors
- Information processing
- Innovation in aerospace and astronautical technology
- Maintenance, repair, and overhaul
- Management of route, terminal, airspace, and airport operations
- Maneuvering flight vehicles
- Marketing
- Materials and structures
- Navigation, guidance, and control
- Noise
- Novel and trend technologies in aerospace
- Numerical and computational methods
- Optics
- Orbit determination
- Organizational behavior and commitment
- Propulsion systems
- Robotics and intelligent systems
- Safety management system (SMS)
- Signal and image processing
- Space mission analysis
- Standards, procedures, training, and certification in aviation
- Sustainable technologies and development
- System design and development for air vehicles
- Test, instrumentation, and validation
- Trajectory optimization
- Vehicle conceptual design
- Weather and meteorology
