

Editor's Foreword

First of all, I would like to thank our precious readers for sharing the excitement of our first census with us. I am pleased to announce that our publication, Cappadocia Academic Review (CAR), has begun publication with this issue.

As it is the first issue, I believe it would be correct to share some information about our magazine with you. Cappadocia Academic Review is an international journal and it is the official publication organ of the Dean of Faculty of Economics and Administrative Sciences of Nevsehir Hacı Bektaş Veli University. Our aim is to share the work done in the field of Economics and Administrative Sciences with the academy and to announce the name of our country and our region with these successful works all over the world. The journal which will be published in online twice a year is accepted as Turkish and English articles.

In the first issue of the CAR, we have been working on our valuable fields from different fields. Muammer Zerenler and Mustafa Atsan conducted a study on the effect of organizational responsibility perceptions on organizational commitment. In the study, 435 employees working in Konya Organizasyon Sanayi Bölgesi were taken as samples and multiple regression analysis was applied. In another study, Tuğba Koyuncu and Alper Aslan performed efficiency tests by applying both time series and panel data analysis with the data of three different stock exchange at a certain time interval based on the effective market hypothesis. Ahmet Sezer Kúpeli et al. They solved the flow type scheduling problems considering the learning effect caused by the human factor by using the parallel kangaroo algorithm. Scheduling problems are often encountered with indefinite processing times, which in turn leads to blurring of processing times. For this reason, fuzzy logic has been used to solve the problem. In addition, the study results were compared with other studies in the literature. In another study, Şükran Güngör Tanç and Emel Karatekin conducted a study that examined the role of internal audit in the corporate governance process. In the study, 60 holdings operating in Istanbul Stock Exchange in 2016 were handled and internal audit activities were examined. Alper Aslan et al. Energy consumption and economic growth in the G8 countries, as well as the relationship between energy consumption and international trade. Full Modifiye Least Squares and Dynamic Least Squares Method.

Academic publishing is a significant necessity for promoting scientific studies to the scientific world. With this consciousness, we are happy to publish our faculty's first journal. Our Publication and Editorial Boards comprise specialized academics and their efforts shall raise the scientificquality of our Journal to make it a preferable reference in the future.

Prof. Dr. Alper ASLAN
