Instructions to Authors

About Journal

The Marmara Medical Journal, Marmara Med J, is a multidisciplinary, academic publication of Marmara University, School of Medicine. It is an open access, double blind peer-reviewed journal. It publishes manuscripts that focus on clinical and laboratory medicine, health care policy and medical education, ethics, and related topics. It includes original research papers, case reports, reviews, articles about clinical and practical applications and editorials, short reports, letters to the editor and occasionally a photo-quiz.

The Marmara Medical Journal is continuously published since 1988 and its archive with full-text manuscripts can be reached under www.dergipark.org.tr/marumj/archive.

Frequency: Three times a year (January, May, October)

Year of first print issue: 1988

Year of first online issue: 2004 (Between 2004 and 2011 the Journal was published solely in an electronic format.)

Language: English

Print ISSN: 1019-1941 **eISSN:** 1309-9469

The manuscripts published in the Marmara Medical Journal are indexed and abstracted in: Thomson Reuters/Emerging Sources Citation Index (ESCI), EBSCO, SCOPUS, EMBASE/Excerpta Medica, DOAJ (Directory of Open Access Journals), CrossRef, ULRICH'S Database, Google Scholar, The British Library, Turkish Academic Network and Information Center (ULAKBİM)-Turkish Medical Database, TURK MEDLINE-Türk Sağlık Bilimleri (Index of Turkish Health Sciences), Türkiye Makaleler Bibliyografyası (Bibliography of Articles in Turkish Periodicals), Türkiye Klinikleri Tip Dizini (Turkish Citation Index).

Permission Request: Manuscripts, tables, graphics, figures and pictures published in the Marmara Medical Journal cannot be reproduced, archived in a system, used in advertisement materials, without a written permission. Citations can be included only in scientific manuscripts with referral.

Aims and Scope

The Marmara Medical Journal, Marmara Med J, is a peer-reviewed, multidisciplinary academic publication of Marmara University, School of Medicine, which is authored by physicians both nationally and internationally.

The journal aims to publish papers of general interest relating to advances in medical practice and novel treatments that will be of interest to general practitioners, medical

students, and senior practitioners and specialists. Marmara Medical Journal also aims to publish all types of research conducted by medical students.

The Marmara Medical Journal is among the most widely read and cited scientific publications for physicians among journals of its kind nationally and increasingly gaining new readers and authors internationally with its English only format since 2016.

The journal consists of manuscripts on recent developments in general and internal medicine and new methods of treatment based on original research. We greatly welcome research papers, case reports, reviews and occasionally a photo-quiz of an interesting medical encounter in English, only.

Each manuscript is strictly assessed by a select Editorial Board. and refereed critically by two or more reviewers, at least one from another institution. The editor reserves the right to reject or to return the manuscript to the author(s) for additional changes.

Special review issues with invited editors are published since 2015 to focus on specific areas of medicine to bring recent data into attention covering multiple aspects of the chosen topic. Marmara Medical Journal welcomes and encourages physicians from all over the world to publish a special review issue on the topic of their preference as an "Invited editor" to collaborate with authors on the same focus area with the aim of increasing scientific collaboration via publishing.

The Marmara Medical Journal has an open access policy. All articles in the journal are permanently available online for all to read.

Author Guidelines

The Marmara Medical Journal publishes original scientific research papers, case reports, manuscripts about clinical and practical applications and editorials, short reports, letters and occasionally a photo-quiz.

Manuscripts submitted under multiple authorship are reviewed on the assumption that all listed authors concur with the submission and that a copy of the final manuscript has been approved by all authors and tacitly or explicitly by the responsible authorities in the laboratories where the work was carried out.

Manuscripts are accepted for review with the understanding that no substantial portion of the study has been published or is under consideration for publication elsewhere.

The Marmara Medical Journal is in compliance with the Uniform Requirements for Manuscripts Submitted to Biomedical Journals created by International Committee for Medical Editors (ICMEJ link), the World Association of Medical Editors (WAME), the Council of Science Editors (CSE), the Committee on Publication Ethics (COPE) and the European Association of Science Editors (EASE).

Preparation of the Manuscript

1. Manuscript files must be prepared in Word, WordPerfect, EPS, LaTeX, text, Postscript, or RTF format. Figures/Images should be embedded in the manuscript file or sent as external files in TIFF, GIF, JPG, BMP, Postscript, or EPS format.

2. Manuscripts should be approximately 20-25 pages double-spaced, including references, with margins of 2.5 cm.

Pages should be numbered consecutively and organized as follows:

1. Title Page
2. Abstract
3. Keywords
4. Introduction
5. Materials and Methods
6. Results
7. Conclusion
8. References

1. Title Page

The title page should contain the article title, authors' names and academic or professional affiliations, and the address for manuscript correspondence (including e-mail address, Open Researcher and Contributor ID (ORCID) identifier, telephone and fax numbers).

2. Abstract

Abstract of not more than 200 words must be included. The abstract should be divided into the following sections: Objective, Materials and Methods, Results and Conclusion,

3. Keywords

Three to six keywords should be supplied below the Abstract and should be taken from those recommended by the US National Library of Medicine's Medical Subject Headings (MeSH).

<http://www.nlm.nih.gov/mesh/meshhome.html>

4. Introduction

State why the investigation was carried out, note any relevant published work, and delineate the objective of the investigation.

5. Materials and Methods

New methods or significant improvements of methods or changes in old methods must be described. Methods for which an adequate reference can be cited are not to be described, except for providing information about the aims of the method. Details regarding animal housing conditions should be given. All clinical studies must contain :

1. A statement that all experimental protocols have been approved by the Ethical Committee of the Institution prior to the commencement of the studies,
2. A statement that all participants gave informed consent.

6. Results

Duplication between the text of this section and material presented in tables and figures should be avoided. Tabular presentation of masses of negative data must be avoided and replaced with a statement in the text whenever possible. The results must be presented clearly, concisely and without comment.

7. Discussion

The discussion should begin with a brief summary of the findings, followed by the following: how this study is similar or different from prior studies with regards to methods and results and limitations of this study. This section must also relate the significance of the work to existing knowledge in the field and indicate the importance of the contribution of this study.

8. References

The style of references is that of the Index Medicus. List all authors when there are six or fewer, when there are seven or more list the first three, then add "et al.". Unpublished results or personal communications should be cited as such in the text. Where a doi number is available it must be included at the end of the citation. Please note the following examples:

- i. Yazici D, Taş S, Emir H, Sunar H. Comparison of premeal mixed insulin three times daily and basal – bolus insulin therapy started post-operatively on patients having coronary artery bypass graft surgery. Marmara Med J 2011; 25:16-9.doi: 10.5472/

ii. Walker M, Hull A. Preterm labor and birth. In: Taeusch HW, Ballard RA, eds. Avery's Diseases of the Newborn. Philadelphia: WB Saunders, 1998: 144,153.

iii. Hagström H, Nasr P, Ekstedt M, et al. Fibrosis stage but not NASH predicts mortality and time to development of severe liver disease in biopsy-proven NAFLD. *J Hepatol* 2017; 67: 1265-73. doi: 10.1016/j.jhep.2017.07.027.

iv. WONCA Ad Hoc Task Force on Tobacco Cessation.

<http://globalfamilydoctor.com/publications/new/november/09.htm>
(Accessed on)

In the text, reference numbers should be placed in square brackets [], and placed before the punctuation; for example [1], [1-3] or [1,3]. References must be numbered consecutively in the order they are first mentioned.

Figures, Tables, Units

Diagrams and illustrations should be given Arabic numerals. All figure legends should be grouped and written on a separate page. Each Figure should be in one of the following preferred formats: Tiff, JPEG, PDF, and EPS. Tables should be numbered consecutively with Roman numerals in order of appearance in the text. Type each table double-spaced on a separate page with a short descriptive title directly above and with essential footnotes below.

Units will be in general accordance with the International System (SI) as adopted by the 11th General Conference on Weights and Measures.

Following Documents are Required Prior Publication

Approval of the Institutional Ethics Committee

a) Marmara Medical Journal requires that investigations performed on human subjects have the prior approval of the Institutional Ethics Committee on Human Experimentation. Authors are required to submit a signed statement as to the date and details of the appropriate review. The authors must state that the investigation conforms with the principles of Declaration of Helsinki.

b) When studies involve the use of experimental animals, manuscripts should briefly describe the procedures employed for animal care and handling. Where drugs are used at particular concentrations in intact animal systems, the author should indicate some rationale for selection of the particular concentration.

Ethical Issues

Compliance with the principles of the last version of the Declaration of Helsinki for humans and the European Community guidelines for the use of animals in experiments is accepted as a policy by the Marmara Medical Journal. Studies involving human or animal subjects should conform to national, local and institutional laws and requirements. Manuscripts which do not properly consider ethical issues for humans or animals will not be accepted for publication.

<http://www.wma.net/e/policy/b3.htm>

Double-blind Review

This journal uses double-blind review, which means that both the reviewer and author identities are concealed from the reviewers, and vice versa, throughout the review process. To facilitate this, authors need to ensure that their manuscripts are prepared in a way that does not give away their identity.

Plagiarism

Manuscripts are investigated for possible plagiarism once they are accepted for possible publication. If an author receives a plagiarism notice regarding his/her manuscript, the corrections should be made within one month. If the Editorial Board detects any plagiarism on the second check after correction of the manuscript by the authors, the chief editor can reject the manuscript. Your article will be checked by the plagiarism detection software iThenticate.

Funding Source

All sources of funding should be declared as an acknowledgment at the end of the text.

Copyright Release Form

Copyright Release Form must be read and signed by all authors.

Copyright Release Form pdf

Authorship

It is the responsibility of every researcher listed as an author of a manuscript in Marmara Medical Journal to have contributed in a meaningful and identifiable way to the design, performance, analysis, and reporting of the work and to agree to be accountable for all aspects of the work.

Before publication, each author must sign a statement attesting that he or she fulfills the authorship criteria of the

ICMJE Recommendations.

<http://www.icmje.org/recommendations/>

Financial Associations/Conflicts of Interest

All participants – not only the corresponding author – must consider their conflicts of interest when fulfilling their roles in the process of article preparation and must disclose all relationships that could be viewed as potential conflicts of interest according to the Committee on Publication Ethics (COPE) Guidelines and/ or Recommendations for the Conduct, Reporting, Editing, and Publication of Scholarly Work in Medical Journals (ICMJE) Recommendations. Disclosure forms filed by all authors alongside the full text of each article is mandatory.

<https://publicationethics.org/guidance/Guidelines>

<http://www.icmje.org/recommendations/>

We encourage the authors on using the ICMJE Form for Disclosure of Conflicts of Interest to standardize authors' disclosures.

Conflict of Interest Form.pdf

Statement of Human Rights and Statement of Animal Rights

Statement of human rights and statement of animal rights, when necessary, must be signed by all authors prior publication.

Statement of human and animal rights form.pdf

Patient Consent for Publication

Patients have a right to privacy. Identifying information, including patients' names, initials, or hospital numbers, should not be published in written descriptions, photographs or in any kind of patient-related materials. In circumstances where this information is essential for scientific purposes, authors should obtain the patient's (or the legal guardian's) written informed consent prior to the publication.
