Indexing and Abstracting

Contents

Research Article

1 **A Study of Caputo Sequential Fractional Differential Equations with Mixed Boundary Conditions**
Djamel-Eddine Hettadj, Habib Djourdem 56-70

2 **On New Sequences of p-Binomial and Catalan Transforms of the k-Mersenne Numbers and Associated Generating Functions**
Munesh Kumari, Kalika Prasad, Ritanjali Mohanty, Hrishikesh Mahato 71-80

3 **Fuzzy Solutions of Fuzzy Fractional Parabolic Integro Differential Equations**
Nagwa Saeed, Deepak Pachpatte 81-93

4 **Newton-type Inequalities for Fractional Integrals by Various Function Classes**
Fatih Hezenci, Hüseyin Budak, Tingsong Du 94-107

5 **Neutrosophic $\mathcal{I}$-Statistical Convergence of a Sequence of Neutrosophic Random Variables In Probability**
Carlos Granados, Ömer Kişi 108-115
