## Contents

| Pages   | Articles                                                                                                                    | Type             |
|---------|-----------------------------------------------------------------------------------------------------------------------------|------------------|
| 483-499 | A Visual Approach to the Damage Diagnosis of Monoliths from the Monquirá Archaeological Park - El Infiernito in Colombia    | Research Article |
| 501-518 | Evaluation of Building Energy Performance Based on Settlement Scale Design Parameters Using BIM Tools                       | Research Article |
| 520-544 | Integration of Daylight Use and Analysis in Double Skin Facades: A Literature Review                                        | Review Article   |
| 546-554 | Effects of Sub-acute Administration of Onion Waste Quercetin on the Hippocampus of Mice: A Histological Approach            | Research Article |
| 556-574 | Valorization of Sewage Sludge with Pine Sawdust as Biochar: Optimization of the Torrefaction Conditions and Biochar Quality | Research Article |
| 576-591 | Development of a Controlled Released System Based on IPN Types Hydrogel for Cartilage Repair                                | Research Article |
| 593-604 | Head-to-Tail Cyclization of $\alpha$ -Conotoxin TxID Leads to Enhanced Stability in Serum                                   | Research Article |
| 606-620 | An Empirical Evaluation of Feature Selection Stability and Classification Accuracy                                          | Research Article |
| 622-634 | Distinguishing Obstructive Sleep Apnea Using Electroencephalography Records                                                 | Research Article |
| 636-652 | Efficient Algorithm for Dominating Set in Graph Theory Based on Fundamental Cut-Set                                         | Research Article |
| 654-675 | Shallow Convolutional Neural Network for Gender Classification Based on Hand                                                | Research Article |
| 677-686 | A Low-Profile High Isolation Wideband Dual-Polarized Antenna for Sub-1 GHz Base Stations                                    | Research Article |
| 688-699 | Electromagnetic Scattering by Arbitrarily Located Electric and/or Magnetic Conducting Double-Strip                          | Research Article |
| 701-716 | MIL, SIL and PIL Implementation for Closed Loop Control of Flyback Converter                                                | Research Article |
| 718-743 | New Steady State Current Error Limiters for PMSM Drives                                                                     | Research Article |

# Volume: 37 Issue: 2

## JUNE 2024

|           |                                                                                                                                                               |                  |
|-----------|---------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------|
| 745-772   | Overview: Using Hybrid Energy System for Electricity Production Based on the Optimization Methods                                                             | Review Article   |
| 774-791   | Reflective Polarization Conversion with Multi-Functional, Ultrathin Metasurface for Ku- and K-Band Applications                                               | Research Article |
| 793-811   | An Investigation of the Chemical Composition of Bottom Sediments from Dried Lake Gavur of Turkiye by Using XRF and Multivariate Data Analysis                 | Research Article |
| 813-838   | Adsorptive Sequestration of Methylene Blue Dye from Aqueous Solution Using Novel Roystonea regia fruit Pericarp: Isotherm, Kinetics, and Thermodynamics       | Research Article |
| 840-852   | Circular Supply Chain Network Design for E-commerce                                                                                                           | Research Article |
| 854-873   | Fine-Kinney-Based Occupational Risk Assessment using Pythagorean Fuzzy AHP-COPRAS for the Lifting Equipment in the Energy Distribution and Investment Sector  | Research Article |
| 875-893   | Lean Six Sigma Studies in Türkiye: A Literature Review                                                                                                        | Research Article |
| 895-910   | Optimal Equipment Capacity Planning in the Neonatal Intensive Care Unit with Simulation-Optimization Approach                                                 | Research Article |
| 912-922   | Characterizations of Filter Convergent in Terms of Ideal                                                                                                      | Research Article |
| 924-937   | Invariants of Immersions on n-Dimensional Affine Manifold                                                                                                     | Research Article |
| 939-951   | Analytical and Experimental Investigation of Product Geometry and Dimensional Accuracy in the Punching Process of AA 1050 and AA 1070 Sheets                  | Research Article |
| 953-967   | Examining the Corrosion Behavior of 6061-T6 Al Alloy Inside Seawater with Decorative Gold- and Silver-Color Coating                                           | Research Article |
| 969-977   | Observing Conductance Quantization by a Novel Magnetic Control System                                                                                         | Research Article |
| 979-1002  | Classical and Bayesian Inference for the Length Biased Weighted Lomax Distribution under Progressive Censoring Scheme                                         | Research Article |
| 1004-1020 | Survival Prediction with Extreme Learning Machine, Supervised Principal Components and Regularized Cox Models in High-Dimensional Survival Data by Simulation | Research Article |
