

## Language control of the article

The English language of the article accepted at the end of the referee process is checked by the language editors of IJATE. If the language editors find that the language of the article needs proofreading/editing, its language correction will be requested. The language of the article should be checked in terms of sentence structure, scientific correctness, grammar, flow, punctuation, and spelling. **Language correction of the article should only be done by the accredited language institutions recommended below.** It is obligatory to submit the document/certificate showing that the language correction of the article has been made and must be uploaded to the IJATE journal system together with the final revised version of the article. An unedited or undocumented article will be removed from the publication process.

The final version of the language-checked article should be formed according to the "**Article Template-2**" at <https://dergipark.org.tr/en/pub/ijate/page/6150>

At this stage, please remember to add your author information as your article has been accepted.

IJATE accepts editing/proofreading of the article from the following editing services:

IJATE language editing service (Pamukkale University Department of Foreign Languages Teaching):
