

Welcome message from the Editor-in-chief

Talha Müezzinoğlu^{1*}

Dear authors, reviewers and readers of Natural Science and Discovery

It gives me great pleasure to welcome you to the first edition of Natural Science and Discovery for which I have acted as Editor in Chief.

Natural Science and Discovery is an international open access, peer-reviewed scientific research journal that provides rapid publication of articles in all disciplines of Natural science such as Physics, Chemistry, Biology, Mathematics, and their connected Applied Sciences such as Engineering including Biomedical Engineering, Civil Engineering, Food Engineering, Industrial Engineering, Mechanical Engineering, Material Science and Nanotechnology

I am very aware of the responsibilities that the editor's role entails, and I approach my new role with so excitement. I would like to point out that the policy of top priority of NSD is especially to put forward and to reveal the innovations and inspiring outputs for natural science and engineering.. NSD offers an exceptionally fast publication schedule including prompt peer-review by the experts in the field and immediate publication upon acceptance. Not only my deputy editorial concept but also the all editorial board aims the fast reviewing and evaluation of the submitted articles for the forthcoming issues. Our journal distinction is to make difference in this inspection point.

Natural Science and Discovery journal will continue to publish high quality researches on basic sciences and applied sciences.. Original research articles form the bulk of the content, with systematic reviews an important sub-section. We will encourage all authors to work to these standards. Such emphasis on methodological rigour is vital to ensure that conclusions reached from publications contained in the journal are valid and reliable.

Peer review processing remains a vital component of our assessment of submitted articles to NSD. I would like to say that there is strong consensus that accepted articles are often improved by peer review after referees' comments and criticisms are dealt with; this explicit appraisal process also helps to engender trust of the reader. It is predicated that the criticisms of evaluating process containing publication delaying, unreliability of decision making as overly conservative approach. Besides, weaknesses can be managed by an effective and active editorial office, and I believe they are outweighed by the benefits.

Lastly I should thank all our submitting authors, who have toiled in the production of their work, and have chosen Natural Science and Discovery as the journal they would like to publish in.

Have a great Publishing with NSD...

Professor Dr Talha Muezzinoglu

Editor in Chief, NSD.
