

**About the third issue...**

We are in happiness as we achieve to perform our goal including publications from all areas of health sciences which are in our journal plans significantly. In the first two issue, we had publications in the field of healths. Also, in our third issue we tried to create an internationally respected journal with a similar editorial policy.

In this issue, there are two original articles, two case reports and a review. The articles' branches are Parasitology, Genetics, Orthopedic and Traumatology. While the first original article was reviewing *Cryptosporidium* sp. in Erzurum's Potable Water, the second was about The Determination of Genetics and Medical Genetics Knowledge of Students. In addition, the case reports are about diagnosed osteopoikilosis after knee pain and correction of hallux valgus deformity with distal suture anchor. The moreover review presented parasitic diseases of urinary tract.

In our journal publications process, I extend my thanks to our authors, article assessment referees, our editorial board members and our technical team for their support.

**PhD. Asst. Prof. Ülkü KARAMAN**
