The chemical analysis laboratory, also named institute on Drug Abuse, Investigation Bureau, Ministry of Justice (MJIB), is the first drug testing laboratory accredited in respect of ISO/IEC 17025 in Taiwan. The chemical analysis laboratory is responsible for criminal evidence identification via chemical analysis, clandestine lab analysis, drug metabolite analysis, counterfeit medicine analysis, protected wildlife product analysis, and other chemical analysis. Drug urine and drug hair analysis are the main works of forensic toxicological identification in our laboratory. The recent developments on drug urine and drug hair analysis of MJIB in Taiwan are introduced in this poster.
