

Description of male of *Chirotica orientalis* Horstmann, 1983 (Hymenoptera, Ichneumonidae)

Janko KOLAROV*

Enis ERKİN**

Summary

The male of *Chirotica orientalis* Horstmann, 1983 is described for the first time on materials from Turkey.

Introduction

Western Palearctic species of genus *Chirotica* Foerster, 1869 was revised by Horstmann (1983). Sixteen species are known, most of them from Mediterranean area, but the male of only three species are known. After studying of materials, originated from Turkey, the male of *Chirotica orientalis* Horstmann was found and described as below.

Chirotica orientalis Horstmann, 1983

Chirotica orientalis Horstmann, 1983 : 20.

The species is described at two female specimens from South Turkey-Akbez and Gaziantep.

Male : Frons strongly striated transversely, dense and grob punctured laterally. Antenna not so slender, third segment of flagellum 2,5 as long as wide. Tyloids linear, occupied all length of X - XII segments. Head and thorax covered with long white hairs.

* Institute of Introduction and Plant Resources, 4122 Sadovo, Bulgaria

** University of Ege, Faculty of Agriculture, Department of Plant Protection, İzmir, Turkey

Thorax exceptionally strongly rugulose punctured. Mesonotum dense and grob punctured in front half and strongly transversely striated in hind one. Pronotum, mesopleurum and metapleurum grob rugulose punctured.

First abdominal tergite except apical ridge, and second tergite in basal half coarse striated longitudinally. Third tergite fine striated in front third part, the next tergites brilliant, rare punctured. Abdomen compressed apically.

Legs slender, ratios among lengths of hind tarsal segments 52 : 22 : 15 : 9 : 13.

Black; palpi and legs red, coxa and trochanters darkbrown, first tergite apically and all second tergite dark red, tegula yellow coloured.

Material examined : 3 ♂ Diyarbakır, Turkey, 18.04.1985, from samples of Psychidae (Lepidoptera), leg. Ş. Karaat, one of them is deposited in the first author's, two of them are in the second author's collection.

Özet

Chirotica orientalis Horstmann, 1983 (Hymenoptera, Ichneumonidae)
erkeğinin orijinal deskripsiyonu

Türkiye'den gelen örnekler içinde *Chirotica orientalis* Horstmann, 1983'in erkeği ilk defa tanıtıldı.
