Abstract: This article is about the classification status of the language of the Chulym Turks. The authors conclude that the Chulym Turkic language is of the Kipchak Turkic language origin according to the Leipzig–Jakarta list. The data for the research consisted of the most resistant words (the Leipzig–Jakarta list) of the Turkic languages. In this study of Chulym Turkic, field dialectological materials of Valeriya Lemskaia were used. The most resistant words were selected out of the dictionaries of the Turkic languages and compared.

The results revealed a 100-word Leipzig–Jakarta list of the Chulym Turkic words as a result of the comparison with the Oghuz and Kipchak languages. Previously, the Chulym Turkic language was considered to belong to the Siberian group of the Turkic languages that also included the Khakass, Shor and Saryg-Yughur languages. Disagreeing with this, the Chulym Turkic language is shown to be the Kipchak language origin than the Oghuz Turkic one.

Keywords: the most resistant words, languages, Turkic, Kipchak, Oghuz, Chulym Turkic

Çulim Türk Dili, Leipzig–Jakarta Listesi’ne Göre Kıpçak Dil Kökenlidir

Özet: Bu makale, Çulim Türklerinin dilinin sınıflandırılması üzerinedir. Makalenin yazarları, Çulim Türkçesinin Leipzig–Jakarta Listesi’ne göre Kıpçak Türkçesi kökenli olduğu sonucuna varmaktadır. Araştırmada veri tabanı olarak diğer dillerde olduğu gibi Türk dillerinde de ödünləmeye karşı en temel/ dayanıklı sözcükleri belirlemeye başvurulan Leipzig–Jakarta Listesi kullanılmıştır. Çulim Türkçesi için ise Valeriya Lemskaya’nın saha çalışmasına dayalı ağız malzemesine müracaat edilmiştir. Ayrıca bu ağız malzemesi, Türk dillerinin sözlüklerinden seçilen en dayanıklı sözcüklerle karşılaştırılmıştır. Buna göre Leipzig–Jakarta Listesi’ne dayalı olarak 100 Çulim Türkçesi sözcüğü Oğuz ve Kıpçak dilleri ile karşılaştırılmıştır. Türk dillerinin sınıflandırılması ile ilgili daha önceki çalışmalarla Çulim Türkçesinin, Hakas, Şor ve Sarı-Uygur dilleriyle Sibiryada grubuna dahil olduğu düşünülmektedir. Fakat bu makalede ullaştığımız sonuçlar, Çulim Türkçesinin Oğuz Türkçesinden çok Kıpçak dilleri ile benzerlik taşıdığını göstermektedir.

Anahtar Kelimeler: en dayanıklı sözcükler, diller, Türk, Kıpçak, Oğuz, Çulim Türkçesi

1. Introduction

As it is known, the modern Turkic languages are classified into different groups: the Oghuz, Kipchak, Karluk and others. Each group has its own members. For example, the Oghuz languages include the Turkish, Azerbaijani, Turkmen and others.

Before discussing the classification status of the Chulym Turkic language, a few lines about the speakers of it should be written. The Chulym Turks are a people of the South-East of the West-Siberian Plain that inhabit the lower and middle reaches of the River Chulym. The major part of the Chulym Turks are present settlers of the Russian Federation’s Teguldet Region of the Tomsk Oblast and the Tjuxtap Region of the Krasnoyarsk Krai, mainly of the Pasechnoye and Chindat villages. The number of the Chulym Turks is around 365 people.

The Chulym Turkic language consists of the Middle and Lower Chulym dialects. At present, the Lower Chulym Dialect is considered to be totally extinct. The given differentiation goes back to the historical existence of indigenous provinces, i.e. volosts.

2. Materials and Methods

To study the classification status of the Chulym Turkic language, the Leipzig–Jakarta list was taken into consideration. For the convenience of analysis, the Leipzig–Jakarta list was taken from open electronic sources rather than (Tadmor, 2009) due to the arrangement of the material in the former (e.g., the alphabetical order of vocabulary and a single lexeme for identifying each vocabulary sample).

The Leipzig–Jakarta list is a 100 word list to test the degree of relationship of

THE CHULYM TURKIC LANGUAGE IS OF THE KIPCHAK TURKIC LANGUAGE ORIGIN
ACCORDING TO THE LEIPZIG-JAKARTALIST

languages by comparing words that are resistant to borrowing (Tadmor, 2009; Novgorodov, 2012; Novgorodov, 2014a). The indicated 100 most resistant words are used to establish the relationship of Chulym Turkic among the Kipchak and Oghuz languages.

The Leipzig–Jakarta list has already been published on several Turkic languages (Novgorodov, 2014b; Novgorodov, 2014c; Novgorodov, 2014d).

It should be mentioned that we previously came to a conclusion that the Turkic languages are divided into two main groups (Novgorodov, 2015a; Novgorodov, 2015b). The first one is the Yakut and the Kipchak languages, and the second one – the Chuvash and Oghuz languages.

In order to establish a relationship of the Chulym Turkic language among the Kipchak and Oghuz ones, we take into consideration the Turkish language (which belongs to the Oghuz group) and the Tatar and Bashkir languages (which belong to the Kipchak group).

In the study of the Chulym Turkic language, field dialectological materials of Valeriya Lemskaya are used.

3. Results

The result of this study reveals the Leipzig–Jakarta list of the Chulym Turkic language in comparison with the Oghuz and Kipchak languages.

Before presenting the Leipzig–Jakarta list of the Chulym Turkic language, it should be noted that **1** is a number of the Leipzig–Jakarta list item; ‘ant’ – meaning; (3. 817) – index number of World loanword database, available online at <http://wold.clld.org/meaning>; chul. – abbreviation of the Chulym Turkic language; *kimirsyä* – form of a word; (< tu. (ESTJ 2000: 140)) – indication of a word origin, information of a source and its page; tur. – abbreviation of the Turkish language; (TRS 1977: 515) – indication of a source and its page; *karinca* – form of a word; (< tu.) – indication of a word origin that was mentioned above; tat. – abbreviation of the Tatar language; (TRS I 2007: 703) – indication of a source and its page; *kirmiska* – form of a word; (< tu.) – indication of a word origin that was mentioned above; bash. – abbreviation of the Bashkir language; (RBS I 2005: 558) – indication of a source and its page; *kirmiðka* – form of a word; (< tu.) – indication of a word origin that was mentioned above.

We reveal the Leipzig–Jakarta list of the Chulym language in comparison with the Oghuz and Kipchak languages. The Leipzig–Jakarta list of the Chulym language is presented below.

96 ‘wind’ (1.72) chul. *jel'*, *čäl'*, *s'äl* (< tu. (ESTJ 1989: 174)) etc.

All these peculiarities characterize the Chulym language as the mixed language (Shcherbak, 1994).

The majority of forms (67 items: 2, 3, 6, 8, 9, 10, 17, 21, 20, 22, 23, 24, 25, 28, 29, 30, 31, 33, 35, 36, 37, 38, 39, 40, 42, 44, 45, 46, 47, 48, 49, 51, 53, 54, 55, 56, 58, 59, 61, 62, 64, 65, 66, 68, 70, 71, 72, 73, 74, 79, 80, 81, 82, 83, 84, 85, 86, 88, 90, 91, 92, 93, 94, 96, 97, 98, 100) of the Chulym Turkic language are similar to those of the Turkish, Tatar and Bashkir languages and these forms are of the Turkic origin, e.g.:

2 ‘arm’ (4.31), ‘hand’ (4.33) chul. *kol* (< tu. (ESTJ 2000: 37)); tur. (TRS 1977: 555, 265) *kol* (< tu.), *el* (< tu. (ESTJ 1974: 260)); tat. (TRS I 2007: 649) *kul* (< tu.); bash. (RBS II 2005: 334) *kul* (< tu.);

The survey shows that an isolated word (item 43) of unknown origin is revealed in the Chulym language, e.g.:

43 ‘horn’ (4.17) chul. *muz'*, *müüs*, *müs* (< tu. (ESTJ 1978: 243)), *aazır* (< ?)¹; tur. (TRS 1977: 129) *boynuz* (< tu.); tat. (TRS II 2007: 57) *mögez* (< tu.); bash. (RBS II 2005: 326) *mögöđ* (< tu.).

Words of the Turkic origin, which are not traced in the Turkish, Tatar and Bashkir languages and the isolated word of unknown origin reveal specifics of the Chulym Turkic language.

The Chulym Turkic language was previously considered to belong to the Siberian group of the Turkic languages that also included the Khakass, Shor and Saryg-Yughur languages (Mudrak, 2002). We disagree with this statement. Elicitation and comparative analysis of the most resistant words of Chulym Turkic demonstrates that the Chulym Turkic language is the language of the Kipchak Turkic origin.

The analysis of the Leipzig–Jakarta list shows that from 100 items 67 (e.g.: 2, 3, 6, 8, 9, 10, 17, 20, 21, 22, 23, 24, 25, 28, 29, 30, 31, 33, 35, 36, 37, 38, 39, 40, 42, 44, 45, 46, 47, 48, 49, 51, 53, 54, 55, 56, 58, 59, 61, 62, 64, 65, 66, 68, 70, 71, 72, 73, 74, 79, 80, 81, 82, 83, 84, 85, 86, 88, 90, 91, 92, 93, 94, 96, 97, 98, 100) ones are found in the Chulym Turkic, Turkish, Tatar and Bashkir languages simultaneously and these items are similar in form and meaning. This fact demonstrates that these languages have originated from the prototurkic source.

20 items (1, 5, 11, 12, 13, 15, 18, 19, 27, 34, 41, 52, 57, 60, 69, 76, 77, 87, 89, 99) reveal that the Chulym Turkic list in form and meaning is more similar to the Kipchak (Tatar, Bashkir) languages than the Oghuz (Turkish) Turkic ones, e.g.:

1 ‘ant’ (3. 817) chul. *kimirsya* (< tu. (ESTJ 2000: 140)); tur. (TRS 1977: 515) *karinca* (< tu. (ESTJ 1997: 323)); tat. (TRS I 2007: 703) *kirmiska* (< tu.); bash. (RBS I 2005: 558) *kirmiđka* (< tu.);

5 ‘big’ (12.55) chul. *uluu*, *uluuy*, *uluy* (< tu. (ESTJ 1974: 593)); tur. (TRS 1977:

¹ Personal communication with the Bachat Teleut consultants, Denis M. Tokmashev and Mikhail G. Tokmashev, indicates that there might be a link between the Chulym Turkic *aazır* ‘horn’ and *aazıra-* ‘to feed’ due to the fact that in the past, Bachat Teleut babies were nursed with the animal milk using a feeding bottle made of a large animal’s horns with drilled holes inside and some part of the udder pulled onto it; a practice, probably common throughout Siberia.

5. Conclusion

So, totally from 100 items 87 ones of the Chulym Turkic language match the Kipchak (Tatar, Bashkir) items in form and meaning and 67 items are cognate to Oghuz (Turkish) Turkic ones in same way.

Thus, we consider that the Chulym language is more similar to the Kipchak languages than the Oghuz Turkic ones. This circumstance allows us to consider that the Chulym Turkic language is of the Kipchak Turkic language origin.
