

From Editor

I am pleased to present the second issue of 5th volume to all scholars, educators, researchers, authors and students in the field of mathematics education and educational technology. We continue to go on our way standing on our journal policy. The policy is based on the value that the journal should include research papers and survey articles that are international, scholarly and refereed objectively. For us, TURCOMAT as a pioneering journal tries to help define what mathematics teaching and learning look like in the digital age and tries to help explore the scopes and horizons of distance education. In this issue, we published five articles on a variety of topics in the field of mathematics education and educational technology. I hope these articles will help you with your own research endeavors and professional developments.

I would like to thanks all contributors as authors, referees and editors. I want to close by inviting you to participate in TURCOMAT in whatever way that can be as a reader, reviewer and author. I also invite you to help inform your friends and colleagues about the journal.

Prof. Dr. Adnan BAKI
