

SÜRELİ YAYINLAR

(İ M U T 1 1.1 İ İ N

MARCH 1998

- 205 Factors influencing the effectiveness of Split Set friction stabilizer bolts
P.B. Tomory, M.W Grabinsky, J.H. Curran and J.Carvalho
- 215 The challenges and opportunities of ISO 9000 registration: "Your customers are calling"
S.E. Stanley
- 221 Zirconium and hafnium separation without waste generation
A.B.V da Silva, Jr. and LA. Diştin
- 225 In-situ investigations on shearer drum design
O.Z. Hekimoglu and B. Tiryaki
- 228 Parameters for feeder selection and installation
J.W Potma

APRIL 1998

- 63 Simulation of mining venture risks resolution in Canadian markets
S. Frimpong and J.M. Whiting
- 69 Valuing management flexibility. A basis to compare the standard DCF and MAP valuation frameworks
M. Samis and R. Poulin
- 75 Magnola: A novel commercial process for the primary production of magnesium
P Ficara, E. Chin, T. Walker, D. Laroche, E. Palumbo, C. Celik and M. Avedesian
- 81 Smoothing effect, conditional bias and recoverable reserves
G.Pan
- 87 Methodology for developing a stakeholder based external affairs strategy
K.L. Azinger
- 94 The behaviour of zinc, cadmium, thallium, tin and selenium during ferrihydrite precipitation from sulphate media
J.M. Zinck and J.E. Dutrizac
- 102 Efficient metal production aims to reduce CO2 emissions
E. Es-Sadiqi

MAY 1998

- 43 A geomechanical study for a shaft wall rehabilitation program
S. Nickson, D. Sprott, WF Bawden and A. Coulson
- 54 Elaboration d'un modèle de prediction des contraintes in-situ dans la region de la faille de Cadillac

!< Cciuites\, DI". Cİill unci M 11 İvik-

- 59 Effects of geology and mine layout oh roof caving in Phalen Colliery
D.H. Steve Zou and R. MacDonald

- 65 Mining under backfill
G.M.M. Ley C.M. Steed, D. Bronkhorst and R. Gustas

- 76 Keys to successful monitoring of evaporite and coal mines
E. De Souza

APRIL 1998

- 261 In situ strength criteria for tunnel design in highly-stressed rock masses
R. S. Read, N. A. Chandler and E. J. Dzik
- 279 Petrophysics studies of sedimentary rocks from a cross-hole seismic test site
M. S. King and M. Shams-Khanshir
- 291 Measurement of the intrinsic process zone in rock using acoustic emission
W. K. Zietlow and J. F. Labuz
- 301 Ultimate bearing capacity of an anisotropic discontinuous rock mass. Part I: Basic modes of failure
A. Serrano and C. Olalla
- 325 Ultimate bearing capacity of an anisotropic discontinuous rock mass. Part II: Determination procedure
A. Serrano and C. Olalla
- 349 Crack pattern evolution and a fractal damage constitutive model for rock
Yonghong Zhao
- 367 Experimental and numerical evaluation of stress redistribution in thick-walled rocksalt cylinders
Maria Helena Leite, Denis E. Gill and Robert Corthésy

MAY 1998

Special Issue NARMS 98

- 385 Mine Design and Ground control, Instrumentation
- 403 Research and Development
- 427 Numerical Modelling A
- 449 States of Stresses
- 465 Numerical Modelling B
- 477 Ground Support

- 491 Fracture and Discontinuity, Mechanical Breakage of Rocks
- 517 Petroleum Rock Mechanics
- 555 Storage for Petroleum
- 573 Boring Technology
- 585 Storage for Disposal
- 595 Application of Geophysical Techniques
- 609 Rock Mechanics Testing
- 639 Dams and Hydroelectric Projects, Seepage and Grouting
- 645 Yucca Mountain Nuclear Waste Repository
- 657 Rock Slope Stability
- 669 Underground Excavation, Tunnelling, Foundations
- W1-Mine Design and Ground and Ground Control
- 389 Advanced monitoring and analysis of microseismic activity as an aid to mining at Brunswick Mines Paper No. 073
B. P. Simser, P. P. Andrieux, D. A. Peterson, T. A. Mac Donald and J. M. Alcott
- 390 Seismic response of rock mass to blasting and rockburst potential Paper No. 038
M. Eneva, A. J. Mendecki and G. van Aswegen
- 392 Instrumentation and backfill performance in a narrow vein gold mine Paper No. 106
F. Hassani, K. Fotoohi and C. Doucet
- 393 Volume of ground motion and seismic hazard Paper No. 037
M. Eneva, G. van Aswegen and A. J. Mendecki
- 395 Importance of the presence of an auditor specialized in rock mechanics in quality assurance audits of civil works in rock Paper No. 012
D. Y. Santillán
- 397 Stochastic keyblock analysis for stope support design Paper No. 122
G.S. Esterhuizen and K. A. Ackermann
- 398 Strength of support pillars and their foundations in hard rock tabular mining Paper No. 119
M. U. Ozbay and J. A. Ryder
- 399 Large-scale surface disturbances resulting from underground mass mining Paper No. 025
J. F. Lupo
- 400 Evaluation of pullout resistance and direct-shear strength of grouted fiberglass cable bolts Paper No. 066
S. M. Miller and D. C. Ward
- 401 Longwall mining through a graben with anomalous stresses at the Deer Creek mine Paper No. 022
R. R. Goodrich, J. F. T. Agapito, A. Pollastro and L. J. LaFrentz
- WIR Research and Development
- 407 Cement grouts in theory and reinforcement practice Paper No. 077
A. G. Thompson and C. R. Windsor
- 409 Preliminary study for determining water curtain design factor by optimization technique in underground energy storage Paper No. 101
W. Yang and D. S. Kim
- 410 Limestone rocks of the Yucatan Peninsula. Description of the lithology and physical properties based on the results of exploration, investigation and laboratory tests Paper No. 132
L. Espinosa, M. Cerón and Y. A. Sulub
- 412 Earth crust mechanics Paper No. 014
A. A. Bello-Maldonado
- 416 Maximum temperature memory in sandstone and mudstone observed with acoustic emission and ultrasonic measurements Paper No. 099
W. M. Zuberek, B. Zogala, R. Dubiel and J. Pierwola
- 418 Development of a new peak shear strength criterion for anisotropic rock joints Paper No. 040
P. H. S. W. Kulatilake, J. Um B. B. Panda and N. Nghiem
- 421 A new failure criterion for transversely isotropic rocks Paper No. 130
O. Cazacu, N. D. Cristescu and J. F. Shao
- 422 Constitutive behavior of reconsolidating crushed salt Paper No. 029
G. D. Callahan, K. D. Mellegard and F. D. Hansen
- 424 Investigation of the influence of the clay seams in the vicinity of an underground excavation in rock salt Paper No. 054
S. Kwon and J. W. Wilson
- 425 Use of block models for longwall shield capacity and determinations Paper No. 044
L.J. Gilbride, A. M. Richardson and J. F. T. Agapito
- W22-State of Stresses
- 453 Reinforcement systems mechanics, design, installation, testing, monitoring and modelling Paper No. 076
C. R. Windsor and A. G. Thompson
- 454 Progressive failure of a porous limestone under cyclic loading revealed by ultrasonic attenuation Paper No. 072
J. F. Couvreur and J. F. Thimus
- 456 Tensile fracturing of stiff rock layers under triaxial compressive stress states Paper No. 070
Z. Reches
- 458 In situ stress determination using AE and DRA techniques Paper No. 102
M. Seto, M. Utagawa, K. Katsuyama and T. Kiyama
- 460 Influence of fluid viscosity on hydraulically induced crack geometry Paper No. 030
T. Ishida, Q. Chen, Y. Mizuta and J.C. Roegiers
- 463 Temperature effects in underground excavations and its importance in Mexico Paper No. 021
I. L. Olmos
- 464 Investigation of the shear stress distribution around an excavation in rock salt Paper No. 055
S. Kwon and J. W. Wilson
- W31-Numerical Modelling B

- 469 Progress on the development of a three-dimensional capability for simulating large-scale complex geologic processes Paper No. 083
J. Guadalupe Argüello, C. M. Stone and A. F. Fossum
- 471 Using three dimensional structural simulations to study the interactions of multiple excavations in salt Paper No. 084
E. L. Hoffman and B. L. Ehgartner
- 472 Micromechanics and homogenization techniques for analyzing the continuum damage of rock salt Paper No. 041
K. L. Devries, D. H. Allen and L. D. Hurtado
- 473 Modeling flow in heterogeneous dual-porosity media Paper No. 057
M. Zaman, M. Bai, J. Cao, and J.-C. Roegiers
- 474 Correlation between rock permeability and stress induced anisotropy Paper No. 062.
M. Bai, F. Meng and J.-C. Roegiers
- 476 Computer simulation of open pit bench blasting in jointed rock mass Paper No. 121
Z. Jia, G. Chen and S. Huang
- W32-Ground Support
- 481 Linear-support design for underground excavations in rock Paper No. 133
C.A. Lauro and A. P. Assis
- 482 Field testing of a yielding support system Paper No. 087
E. De Souza, P. Mottahed and M. Molavi
- 483 The tensometric rockbolt for stress measuring Paper No. 113
R. Snupárek
- 484 Support and strata interaction in longwall faces Paper No. 049
R. Özel and E. Ünal
- 486 Selection criteria for shield supports Paper No. 050
E. Ünal and R. Özel
- 488 Ground control and design of deep mine openings Paper No. 089
B. Amusin
- 489 A neural approach, to sand production prediction in wells Paper No. 060
M. Kanj and J.-C. Roegiers
- TI 1-Fracture and Discontinuity, Mechanical Breakage of Rocks
- 495 Optimal delineation of joint sets using a fuzzy clustering algorithm Paper No. 136
R. E. Hammah and J. H. Curran
- 497 Modelling of blasthole expansion and explosive gas pressurization in jointed media Paper No. 048
A. Mortazavi and P. D. Katsabanis
- 499 Quantifying joint roughness using artificial neural networks Paper No. 093
J.S. Lessard and J. Hadjigeorgiou
- 500 On the natural collapse of fractures in rocks with low fluid Paper No. 019
M. C. S. Arriaga and F. S. Verduzco
- 502 Effects of anisotropics on fluid flow in deformable fractured media Paper No. 058
M. Bai, Y. Abouseiman, S. Ahseek M. Chen and J.-C. Roegiers
- 504 Matching simulated fracture data with field measurements using joint intensity Paper No. 010
J. Ehlen
- 505 Laboratory investigation of bit wear in water jet assisted cutting of a continuous miner Paper No. 018
A. W. Khair and V. B. Achanti
- 506 A comparison of eight methods for measuring grain and boundary cracking in heated quartzite samples Paper No. 068
J. Kemeny and Z. Zomeni
- 508 Derivation of fracture spatial pattern parameters from borehole data Paper No. 134
W. Dershowitz, P. La Pointe and T. Cladouhos
- 509 Three-dimensional numerical simulation of slippage along natural fractures induced by earthquakes Paper No. 116
P. R. La Pointe, P. C. Wallmann, T. Cladouhos, A. L. Thomas and S. Follin
- 510 Modeling notch-formation mechanisms in the URL mine-by test tunnel using bonded assemblies of circular particles Paper No. 067
D. O. Potyondy and P. A. Cundall
- 512 Reexamination of fault angles predicted by shear localization theory Paper No. 088
J. W. Rudnicki and W. A. Olsson
- T12-Petroleum Rock Mechanics
- 521 Reduction of hydraulic diffusivity during reactive flow in clays and shales Paper No. 036
M. B. Geilikman and M. B. Dusseault
- 522 Assessment of some semi-analytical models for non-linear modelling of borehole stresses Paper No. 034
P. A. Nawrocki, M. B. Dusseault, R. K. Bratli and G. Xu
- 523 Evaluation of openhole cavity completion technique in coalbed methane reservoirs Paper No. 074
H. H. Vaziri and I. D. Palmer
- 525 A porosity-gradient controlled simulation model for solids production Paper No. 104
L. Zhang and M. B. Dusseault
- 526 Centrifuge tests to identify mode of sand production and its effect on production Paper No. 075
H. H. Vaziri, S. Thallak and R. Phillips
- 527 Solids production prediction in a highly heterogeneous carbonate formation Paper No. 100
A. Onaisi and D. Richard
- 528 Stability of perforations near hydraulic fractures Paper No. 091
P. Papanastasiou and A. Zervos
- 529 Chalk production and effects of water weakening Paper No. 110
E. Papamichos
- 531 An erosion-mechanical model for sand production rate prediction Paper No. 090
E. Papamichos and M. Stavropoulou

- 533 Preliminary assessment of particle flow code as a tool to assess ore pass safety Paper No. 092
M. K. Larson, S. R. Iverson, B. M. Stewart, and K. Walker
- 534 ASRS-A unified approach in reservoir rock mechanics Paper No. 059
Y. Abousleiman, M. Bai, H. Zhang, S. Ekbote, T. Liu and J.-C. Roegiers
- 536 Deepwater shale swelling potential evaluation Paper No. 065
H. Santos, A.J.Diek and J.-C. Roegiers
- 538 A solution for stress distribution around an inclined borehole in shale Paper No. 043
A.Ghassemi, A. Diek and J.-C. Roegiers
- 541 Three-dimensional analysis of Belridge oil reservoir well failures due to rock-structure interactions Paper No. 082
L. B. Hubert Jr., R. L. Gwinn, T. A. Moroney and G. L. Deitrick
- 544 Stress-induced variations in acoustic velocities in chalk Paper No. 125
T. E. Scott Jr., M. Azeemuddin, M. Zaman and J.-C. Roegiers
- 546 The effect of total stress and temperature on the water activity of shales Paper No. 097
C. F. Fonseca and M. E. Chenevert
- 548 Electrochemical aspects of wellbore stability: ionic transport through confined shales Paper No. 098
R. F. T. Lomba, M. M. Sharma and M. E. Chenevert
- 550 Discrete feature network approaches for enhanced oil recovery Paper No. 135
W. Dershowitz T. Eiben, E. Wadleigh and T. Cladouhos
- 551 Modeling multisegmented hydraulic fracture in two extreme cases: no leakoff and dominating leakoff Paper No. 103
L. N. Germanovich, D. K. Astakhov, J. Shlyapobersky, M. J. Mayerhofer C. Dupont and L. M. Ring
- T21 -Storage for Petroleum
- 559 Study of correlation between creep tests and variable deviator stress tests in samples of rock salt from Tuzandepetl Dome, Veracruz, Mexico Paper No. 107
E. Galván Garcia and J. Herrera Estrada
- 563 3D geomechanical simulations of leached $c^>jm$, are they mandatory? T. You, Hi Paper No. 108
Henrion, J. Nunez Farfán, G. Vouille and S. M. Tijani
- 566 Mathematical and physical modelling while underground storage stability assessment Paper No. 1 14
V. I. Smirnov, N. S. Khachaturyan and E. M. Shafarenko
- 569 Geomechanical analysis of pressure limits for gas storage reservoirs Paper No. 069
M. S. Bruno, M. B. Dusseault, T. T. Balaa and J. A. Barrera
- T22-Boring Technology
- 577 Geophysical methods and GIS for disposal assessment and environmental monitoring Paper No. 127
B.C. Xu, M. B. Dusseault and Y. L. Chi
- 578 Evaluation of drilling parameters of a PDC bit Paper No. 109
D. Nguyen Minh, H. Geoffroy, J. Bergues and C. Putot
- 581 Types of rock and drilling of wells in the geothermal fields of Mexico Paper No. 024
R. Maya-González and J. Vazquez-Hernandez
- 582 Borehole stability analyses in fluid saturated formations with impermeable walls Paper No, 061
L. Cui, S. Ekbote, Y. Abousleiman, M. M. Saman and J.-C. Roegiers
- 584 Thermoporoelastic modelling of wellbore stability in non-hydrostatic stress field Paper No. 063
X. Li, L. Cui and J.-C. Roegiers
- T31 -Storage for Dispolas
- 589 Investigation of the long-term development of damaged zones around underground openings in rock salt Paper No. 027
H.-J. Alheid, M. Knecht and R. Liideling
- 591 Mechanical behavior of waste blends for salt cavern disposal Paper No. 033
B. Lemieux, B. Davidson and M. Dusseault
- 592 The influence of bedding plane orientation on the compression-dilation boundary in anisotropic rock salt Paper No. 005
Y. H. Hatzor and E. P. Heyman
- 593 Experimental determination of the relationship between permeability and microfracture - induced damage in bedded salt Paper No. 042
T. W. Pfeifle, N. S. Brodsky and D. E. Munson
- T32-Application of Geophysical Techniques
- 599 Application of anisotropic georadar tomography to monitor rock physical property changes due to excavations Paper No. 013
Y. Jung, M. Song and J. Kim
- 601 A new application of geoelectric methods for shallow cavity investigation at "La Amistad" Dam, Mexico. Paper No. 046
A.Vázquez-Contreras and D. Saucedo Quinones
- 602 Rock mass characterization using a magnetoteluric survey Paper No. 045
R. Aranda Lopez
- 604 Gravity survey in the Valle de Bravo area, Mexico, a geotechnical application Paper No. 047 J. J. Briones Gálvez and A. Vázquez-Contreras
- 605 Application of geophysical techniques for risk zones localization in Mexico City Paper No. 011
E. Del Valle Toledo
- Fl I-Rock Mechanics Testing
- 613 Thermal conduction and expansion of saturated quartzillitic' and smectitic shales as a function of stress, temperature, and bedding anisotropy Paper No. 035
D. A. MacGillivray and M. B. Dusseault
- 614 In-situ deformability of moderately to highly stressed mine structures in hard rock Paper No. 123
D. Labile, B. Conlon and R. Boyle

- 616 Strength characterization of a typical swelling shale Paper No. 126
J. C. Fooks and M. B. Dusseault
- 617 Spherical hydrostatic compaction-creep testing equipment Paper No. 128
B. Davidson, B. Lemieux, D. Hirst, J. Fooks and M. Dusseault
- 618 Application of the Miniature Seismic Reflection (MSR) system for monitoring dynamic changes in mechanical properties of rocks Paper No. 039
A. Sadri, F. P. Hassani and M. Momayez
- 620 The influence of in-situ stress on the tensile fracture pattern induced by hoop tests
Paper No. 004
H. D. Park
- 621 Breakage resistance of a granite using new testing devices Paper No. 002
M. P. Luong and N. Hoteit
- 623 Spherically isotropic spheres subject to diametral point load test: analytic solutions
Paper No. 006
X. X. Wei and K. T. Chau
- 625 Evaluation of the macroscopic deformation characteristics of rock mass obtained by rock tests and measurements Paper No. 094
S. Hibino and M. Kamijo
- 626 Rock deformation in a multiaxial compression state
Paper No. 003
E. Gaziev and J. Alberro
- 628 An experimental study on the size effect in block punch index test and its general usefulness Paper No. 008
R. Ulusay and C. Gokceoglu
- 630 Intact rock classification based on time-dependent deformational properties
Paper No. 016
A. Özgenöglü
- 631 Capillary forces: how important are the effects on shale breakage in laboratory testing?
Paper No. 064
H. Santos, A. Diek and J.-C. Roegiers
- 633 Physical and mechanical properties of degraded waste surrogate material Paper No. 081 F. D. Hansen and K. D. Mellegard
- 634 Solutions for hollow cylinders in transversely isotropic porous materials Paper No. 117 L. Cui, Y. Abousleiman and J.-C. Roegiers
- 637 Permeability of natural rock salt from the Waste Isolation Pilot Plant (WIPP) during damage evolution and healing
Paper No. 028
T. W. Pfeifle and L. D. Hurtado
- F12-Dams and Hydroelectric Projects, Seepage and Grouting
- 643 Geology and tectonics of West Panama and their relation with the design of a hydroelectric project Paper No. 051
R. Ch. Riva Palacio and E. V. Hernandez Lopez
- 644 In situ stress measurements in the pre-excavation design stage of the Serra da Mesa hydroelectric project, Brazil Paper No. 124 B.C. Haimson
- F13-Yucca Mountain Nuclear Waste Repository
- 649 Post-test comparison of thermal-mechanical measurements vs. analyses for the in-situ single heater test, Yucca Mountain, Nevada Paper No. 056
S. R. Sobolik, R. E. Finley and S. Ballard
- 650 Post-test comparison of thermal-hydrologic measurements and numerical predictions for the in-situ single heater test, Yucca Mountain, Nevada Paper No. 071
S. Ballard, N. D. Francis, S. R. Sobolik and R. E. Finley
- 652 Site-specific thermal and mechanical property characterizations of in-situ thermal test areas at Yucca Mountain, Nevada Paper No. 078
N. S. Brodsky and G. Barker
- 654 The Yucca Mountain project drift scale test Paper No. 079
R. E. Finley, S. C. Blair, W. J. Boyle, J. J. Danneels, R. N. Datta, N. Z. Elkins, I. T. George, E. F. Homuth, M. Y. Lee, W. Lin, M. T. Peters, M. Riggins, Y. Tsang, R. A. Wagner, D. J. Weaver and R. M. Yasek

21 Comment

Refractories in consolidation

22 World of Minerals

40 China's export system

James Devlin sheds some light on China's often confusing mineral export licence system

42 What is IMA?

A review of the organisation set up to bring together European industrial mineral associations under one umbrella

47 Potash producers

A round-up of leading potash producers and market trends

67 Kemira Pigments profile

IM talks to Kemira Pigments Oy about its strategy in response to difficult trading conditions

75 M13 KL paper abstracts

89 Refractories in India

Industry response to growing consumption of refractories

95 Chinese joint ventures

Highlights of Advanced Materials Resources journey into its Chinese rare earths business

109 Crystalline silica

Current regulations and actions over the effect of crystalline silica on human health

119 China's glass processing industry

A review in terms of the ninth five-year-plan period

123 Zeolite based systems

A discussion of zeolite based systems in the reduction of emissions

MAY 1998

7 Comment

Glossing over the competition

8 World of Minerals

23 Soda ash review

A natural bias for trona

Roger Pechey provides a global review of the soda ash market, including the dominance of the USA, the effect of anti-dumping duties, plant closures, and changes in ownership.

35 Alumina trihydrate Chemical attraction

Growing at a level of around 4%, with other more specialised grades showing a rate of almost 10% per annum, the ATH market is as healthy as ever. This article reviews production and markets in Asia, North America, and Europe.

45 Refined ideas

Fluorspar purity the goal for Minera Las Cuevas

This profile outlines Mexican fluorspar producer Minera Las Cuevas' activities.

49 European acidspars

An overview of production

Peter Huxtable of Laporte Minerals places the European acidspars industry in a global context.

55 Perlite & vermiculite

Crudely speaking, the potential is good

The late Prof. Israel Lin kindly contributed this review of specific utilisation of crude, unexpanded perlite and vermiculite.

MAY 1998

- 397 Review of froth modelling in steady state flotation systems
Z. T. Mathe, M. C. Harris, C. T. O'Connor and J.-P. Franzidis
423 Froth zone modelling of an industrial flotation column
J. B. Yianatos, L. G. Bergh and G. A. Cortes
437 Premature centrifuging, oscillation and axial mixing of an industrial grinding mill load
M. A. Van Nierop and M. H. Moys
447 Separation of indium and iron by solvent extraction
M. C. B. Fortes and J. S. Benedetto
453 Development of a pilot plant using clean technology for the recovery of gold from small scale mines
P. Dandois, G. Cáceres, P. Joly and J. Frenay
457 Study and test on a new flotation device: CM flotation cell
C. Xinghua
463 Flocculation of colloidal silica with polyacrylamide and the effect of dodecylamine and aluminium chloride pre-conditioning
C. A. M. Baltar and J. F. Oliveira
469 Correspondence
473 Calendar of International Conferences, Symposia, Courses and Meetings of Interest
479 Minerals Engineering Conferences
481 Patents Alert

MİSYONUMUZ

- Yöre İnsanlarıyla karşılıklı güven içinde olmak ve değerlerine saygı göstermek
 - Yörenin sosyal ve ekonomik gelişmesine katkıda bulunmak
 - » Mevcut en yüksek çevre standartlarını uygulamak
 - Mevcut en iyi teknolojiyi kullanmak
 - Kalıcı ve ekonomik katkısı yüksek bir altın madenciliği geliştirmek

*Bu tesis, 1997 Aralık ayından beri
DENETİM beklemektedir.*

(Bu taprafca Cann altında atıl duran zenginlikleri yeryüzüne çıkarıp değerlendirme^ bize gurur verecek^ ayrıcahfclı Bir görevdir)*

EüTOfplH Madencilik JLŞ.
