

Editorial

Dear Colleagues,

We are glad to introduce the new issue of CEOTI. In this issue, you will read a letter to the editor by Prof Dr Ferenc Kuhn. It is about the pearls and pitfalls of ocular trauma, an invaluable topic for every ophthalmologist. In this issue, you will also find an interesting review discussing the similarities and differences regarding ocular manifestations of feline infectious peritonitis, a fatal infection caused by feline enteric coronavirus in felids and Sars CoV-2 in humans. Also in this issue, you may read a case report about a wooden foreign body penetrating orbit and the management approach

We hope that this issue will be beneficial for your outpatient practice .

Respectfully,

Assoc Prof Berna Akova, MD, FICOphth
