

Aim and Scope of IJENS's

The International Journal of New Findings in Engineering, Science and Technology (IJONFEST) is an international, peer-reviewed scientific journal. International Journal of New Findings in Engineering, Science and Technology (IJONFEST) started its publishing life in July 2023. The aim of the journal is to serve researchers, engineers, scientists and all those who can benefit from it all over the world by providing theoretical and applicable knowledge in the field of engineering, science and technology. Regarding this aim, the International Journal of New Findings in Engineering, Science and Technology (IJONFEST) covers a wide spectrum of research achievements. Thus, highly technological, creative and original research results, scientific reviews and short communication notes in a suitable balance of experimental, theoretical and computational aspects are considered for publication. The publication language of the journal is English. Manuscripts previously published in another journal or conferences are not accepted.

The IJONFEST is free of charge and published two times a year (in September and March). It allows authors to submit articles online and track their progress via its web interface. From time to time, the IJONFEST will publish review articles and bring out special issues on a specific sub-field of engineering, science and technology. Authors are encouraged to contact the Editors if they would like to submit a review article or bring out a special issue of the Journal.
