

**Turkish Journal of Analytical Chemistry**  
**2026**  
**Volume: 8**  
**Issue: 1**  
**Contents**

**Research Articles**

- An efficient strategy for designing polycyclic superhalogens from corannulene: A DFT study **1–8**  
*Abdurrahman Atalay*
- Phenolic content and antioxidant capacity in different plant parts of *Hypericum elongatum* and *Hypericum orientale*: A comparative study **9–19**  
*Cansu Altuntaş*
- Synthesis of high beta-phase content granules from recycled PVDF material: Effect of process parameters and ceramic fillers **20–28**  
*Raşit Sezer\*, Ahmet Buğra Başer*
- Electrochemical determination of 2,4,6-trinitrophenol in the presence of nitrophenol derivatives and phenolic compounds using a graphene oxide/polyethyleneimine modified glassy carbon electrode **29–41**  
*Şener Sağlam*
- Removal of coomassie brilliant blue G-250 from aqueous solutions by Purolite A420S anion-exchange resin **42–50**  
*Şuheda Nur Karakaya, Ayçanaz Aylanç, Özgür Arar\*, Müşerref Arda*
- Hazelnut shell-derived carbon nanodots enhance wheat (*Triticum aestivum*) drought tolerance: improved photosynthetic performance and phenolic profile **51–63**  
*Cansu Altuntaş*

**Reviews**

- Electrochemical methods for food and food quality analyses: A review **64–84**  
*Berrin Gürler Akyüz*
