### ABOUT THE JOURNAL

Online Turkish Journal of Health Sciences (OTJHS) is an international, peer-reviewed, open-access scientific journal dedicated to the dissemination of high-quality research in all areas of health sciences. The journal aims to advance knowledge and practice by publishing original research articles, invited reviews, case reports, and short communications that address current and emerging issues in healthcare.

OTJHS provides a multidisciplinary platform for researchers, clinicians, and academicians working in fields such as medicine, dentistry, nursing, pharmacy, public health, and allied health sciences. The journal encourages the integration of basic, clinical, and translational research, fostering collaboration across different disciplines to improve health outcomes and patient care.

The journal is committed to upholding the highest standards of publication ethics and follows internationally recognized guidelines, including those of the Committee on Publication Ethics (COPE), the International Committee of Medical Journal Editors (ICMJE), and relevant best practice frameworks. All submitted manuscripts undergo a rigorous double-blind peer-review process to ensure scientific accuracy, originality, and relevance.

OTJHS is published in English and aims to reach a global audience by providing unrestricted online access to its content. By adopting an open-access model, the journal ensures that all published articles are freely available to researchers, practitioners, and the public, thereby promoting wider dissemination and greater impact of scientific knowledge.

OTJHS operates primarily under an **open-access publishing model**, meaning that all published articles are freely accessible online without any subscription or access fees. This ensures that scientific knowledge can be widely disseminated and accessed by researchers, clinicians, students, and policymakers worldwide without restriction.

The journal welcomes submissions that contribute to evidence-based practice, innovation in healthcare, and the improvement of health systems at local, national, and international levels. The journal is indexed [TR INDEX](#).
