Similarity Report

Note that the authors are required to provide a similarity report (plagiarism) when they submit their manuscript to EJSET. Full text of your article should be checked with "iThenticate" program except references section. The similarity rate report that you will receive from the related program should be uploaded to the system. The rate of plagiarism to be tolerated is maximum 20% for research articles and maximum 30% for review articles. Studies with a plagiarism rate above the specified values will not be considered for the evaluation process.
