Research Paper

Received: dd.mm.202y

Revised: dd.mm.202y

Accepted: dd.mm.202y

Abstract—This document is a template for use by authors sending manuscripts to the International Journal of Information Security Science. It also contains important information on the paper style. The title of the manuscript must be written in lower case except for the first word and proper nouns. Author names must be given in full, with surnames (family names) all in capitals. Author addresses must be given in English in the following order: Department, Faculty, University, City, Country, with numbers in superscript after each author name to indicate his/her address. Footnotes must not be used for addresses. The corresponding author's email address must be clearly given, marked with an asterisk. The abstract must not be longer than 300 words and must clearly state the study's purpose and results. The manuscript's title and abstract must not contain mathematical formulae. The abstract must not contain any reference citations. The key words must be separated by commas and should not include acronyms.

Keywords—information security, instructions for authors, manuscript template

1. Introduction

Authors should use this template very carefully when preparing a manuscript for submission to the International Journal of Information Security Science. **The manuscript must be written in L^AT_EX. Other formats are not accepted.** The text in this template can be replaced by typing or copy/pasting to form the final form of the manuscript. The style of this document should never be changed. Please make sure that, in addition to this template, you carefully read and follow the “Instructions for Authors” in the journal web site. Submissions that do not strictly follow this template and/or all instructions for authors are returned back to authors without review.

1.1. Sections and subsections

Articles should be divided into sections and subsections. Principal sections should be numbered consecutively (e.g., as 1. Introduction, 2. Materials and methods, etc.), while subsections should be numbered as 1.1., 1.2., etc. Do not use numbers for the Acknowledgments and References sections. This journal is free of charge (for both authors and readers).

The Introduction should argue the case for the study, outlining only essential background, and should not include details of findings or conclusions. It should not be only a review of the subject area, but it should also contain a clear statement of the question being addressed. In the Materials and methods section, please provide concise but complete information on materials and analytical/statistical

procedures used. This part should be as clear as possible to enable other scientists to repeat the research presented. For example, brand names and company locations should be supplied for all mentioned equipment, instruments, chemicals, etc. Results of the study should be given in the Results section. In the Discussion section, where findings are discussed, statements from the Introduction and Results sections should not be repeated unnecessarily. It is advised that the final paragraph of the Discussion section highlights the main conclusions of the study. The Results and Discussion sections may be combined. Where necessary, you can refer to sections like Section 1.

Figure 1. A sample figure.

Manuscripts must be written in English. Contributors who are not native English speakers are strongly advised to ensure that a colleague fluent in the English language or a professional language editor has reviewed their manuscript. Concise English without jargon should be used. Repetitive use of long sentences and passive voices should be avoided. It is strongly recommended that the text be run through computer spelling and grammar programs. Either British or American spelling is acceptable but it must be consistent throughout. Manuscripts written

in poor English will not be submitted to referees for evaluation and will be returned back to authors.

We emphasize that the style of this document, including line spacing, margins, fonts, and page numbers, should never be changed.

1.2. Symbols, units, and abbreviations

In general, this journal follows the conventions of *Scientific Style and Format, The CSE Manual for Authors, Editors, and Publishers, Council of Science Editors, Reston, VA, USA*. All symbols, such as $\times, \mu, \eta,$ and $\nu,$ should be written by using corresponding \LaTeX definitions. For example, the degree symbol should be used as $^\circ$ and it should not be written by using superscripted letter o or number 0. Similarly, the multiplication symbol must be used as $\times,$ not the letter x. Spaces must be inserted between numbers and units (e.g., 3 kg, 2 m, 10 V) and between numbers and mathematical symbols (e.g., +, -, $\times,$ =, <, >), but not between numbers and percent symbols (e.g., 45% is the correct version). Please use SI units. All abbreviations and acronyms should be defined at the first mention. Latin terms such as et al., in vitro, and in situ, should not be italicized.

Table 1.
 A sample table including some styles.

GKA - protocol steps with contributions	Computational cost (ms)	Communication cost (bits)
Round 1 - Step 1	28	$\Theta(1)$
Round 2 - Step 2	$13 + 5n$	$\Theta(n)$
Round 2 - Step 3	6	$\Theta(1)$
Total cost of protocol	$(42 + 5n)$	$\Theta(n)$

1.3. *References within the Text and Reference List*

References should be cited in the text by numbers in square brackets. Please do not use individual sets of square brackets for citation numbers that appear together, e.g., use [1], [2] or [1], [3], [4], not [1],[3],[4], or [2]–[5]. All references cited in the manuscript must appear in the list of references at the end, while all references listed in the reference list must be cited in the manuscript.

References should be formatted as follows (please note the punctuation and capitalization):

Book

Basic Format: J. K. Author, “Title of chapter in the book,” in Title of His Published Book, xth ed. City of Publisher, (only U.S. State), Country: Abbrev. of Publisher, year, ch. x, sec. x, pp. xxx–xxx.

Book with chapter title

Basic Format: J. K. Author, “Title of chapter in the book,” in Title of Published Book, X. Editor, Ed., City of Publisher, State (only U.S.), Country: Abbrev. of Publisher, year, ch. x, sec. x, pp. xxx–xxx.

Examples:

[1] A. J. Menezes, P. C. van Oorschot, and S. A. Vanstone. Handbook of Applied Cryptography. CRC Press, 1997.

[3] P. Haynes, “Al-Qaeda, oil dependence, and U.S. foreign policy,” in Energy Security and Global Politics: The Militarization of Resource Management, D. Moran and J. A. Russell, Eds. New York, NY, USA: Routledge, 2009, pp. 62–77.

[4] M. Abramowitz and I. A. Stegun, Eds., Handbook of Mathematical Functions, ser. Applied Mathematics Series 55. Washington, DC, USA: NBS, 1964, pp. 32–33.

Conference Paper

Conference Paper (Paper Presented at a Conference)

Basic Format: J. K. Author, “Title of paper,” presented at the Abbreviated Name of Conf., City of Conf., Abbrev. State, Country, Month and day(s), year, Paper number.

Conference Proceedings With Editors

Basic Format: J. K. Author, “Title of paper,” in Abbreviated Name of Conf., X. Editor, Ed. (location of conference is optional), year, pp. xxx–xxx.

Conference Proceedings With Series Title, Volume Title, and Edition

Basic Format: J. K. Author, “Title of paper,” in Abbreviated Name of Conf. in Volume Title, in Series Title, ed., year, pp. xxxxxx.

Examples:

[2] K. Kirby and J. Stratton, “Van Allen probes: Successful launch campaign and early operations exploring earth’s radiation belts,” presented at the IEEE Aerosp. Conf., Big Sky, MT, USA, 2013.

2. Orcid Logo

In order to compile your document `ijiss_main.tex` without errors and to get the orcid logo under the title, make sure that the `orcidlogo.pdf` is in the folder you are working in. Note that `orcidlogo.pdf`, `ijiss_main.tex`, `ijiss.cls`, `references.bib` and your supplementary files like figures must be in the same folder.

3. Environments

Different environments can be used in the manuscript. Some examples (theorem, proof, example) are as follows.

Theorem 1 *The following simplifying assumptions were made to derive the dynamic model of the PMSM in the rotor reference frame.*

Proof: The following simplifying assumptions were made to derive the dynamic model of the PMSM in the rotor reference frame. \square

Example 1 *The following simplifying assumptions were made to derive the dynamic model of the PMSM in the rotor reference frame.*

The format of an equation should be like

$$x + y = 1. \quad (1)$$

Then, it can be referred in the text as (1). If it is short, an equation can be written in line as $x+y = 1$.

3.1. Tables and figures

All illustrations (photographs, drawings, graphs, etc.), not including tables, must be labelled “Figure”. Figures must be submitted **both in the manuscript and as separate files** (see below for the accepted format). Each figure or table must have

a caption or a legend with a number (e.g., Table 1, Figure 1), unless there is only one table or figure, in which case it should be labelled “Table” or “Figure” without numbering. Captions must be written in sentence case (e.g., “Macroscopic appearance of the samples.”). The font used inside the figures should be Times New Roman. If symbols such as \times , μ , η , or ν are used, they should be added as symbol.

All figures and tables must be numbered consecutively as they are referred to in the text. Please refer to tables and figures with capitalization and as unabbreviated (e.g., “As shown in Figure 2...”, and not “Fig. 2” or “figure 2”). The figures and tables themselves may be given at the end of the text or at appropriate places in the text. **The resolution of images should not be less than 118 pixels/cm when width is set to 16 cm. Images must be scanned at 1200 dpi resolution.** Scanned or photocopied graphs and diagrams are not accepted. Charts must be prepared in two dimensions unless required by the data used. Charts unnecessarily prepared in three dimensions are not accepted.

Figures that are charts, diagrams, or drawings must be submitted in a modifiable format, i.e., our graphics personnel should be able to modify them. All figures must be only in *.pdf format; other formats (e.g., *.eps, *.jpeg, *.png, *.tiff) are NOT accepted. Tables and figures, including caption, title, column heads, and footnotes, must not exceed 16× 20 cm and should be no smaller than 8 cm in width.

The same data or information given in a table must not be repeated in a figure and vice versa. It is not acceptable to repeat extensively the numbers from tables in the text or to give lengthy explanations of tables or figures.

4. Information about references

Do not include personal communications, unpublished data, websites, or other unpublished materials as references, although such material may be inserted (in parentheses) in the text. If the author of a reference is an organization or corporation, use its name in the reference list (using an abbreviation in the citation, if appropriate); do not use “Anonymous”. In case of publications in languages other than English, the published English title should be provided if one exists, with an annotation such as “(article in Turkish with an abstract in English)”. If the publication was not published with an English title, provide the original title only; do not provide a self-translation.

All authors should be included in reference lists unless there are 6 or more, in which case only the first 5 should be given, followed by “et al.”. The manuscript should be checked carefully to ensure that the spellings of the authors’ names and the years are exactly the same in the text as given in the reference list. References should be formatted as shown at the end of this document. Journal titles should be abbreviated according to Thomson Reuters Web of Science © abbreviations.

Acknowledgment

Acknowledgment and/or disclaimers should appear before References. Names of funding organizations should be written in full. **The authors are advised to describe author contributions, e.g., as follows: S.A. gave the idea, F.A. did the experiments, F.A. and S.A. interpreted the results, S.A. wrote the paper.**

5. Conclusion

The conclusion is here.

Appendix A

Appendix 1

Appendix one text is here.

Acknowledgments

The authors would like to thank.
