# **CALL FOR PAPERS**

### Economic, Political and Financial Impacts of the COVID-19 Outbreak

A Special Issue of Journal of Research in Economics, Politics & Finance

## **ABOUT THE SPECIAL ISSUE:**

This special issue of the Journal of Research in Economics, Politics & Finance is titled *Economic*, *Political and Financial Impacts of the COVID-19 Outbreak*. In this special issue, we are actively soliciting research works investigating challenges and potential strategies to the outbreak as well economic, political, and financial aftermath of the COVID-19 pandemic.

The fast-spreading coronavirus (COVID-19), originating in Wuhan, has infected thousands of people in China and many countries around the world. As of March 4, 2020, this coronavirus has spread to more than 70 countries, with 90,000 cases and 3,100 deaths. In the age of globalization, public health security bears on the life and health of all humanity and has multiple impacts on economic, financial, and various aspects of society.

During this epidemic outbreak, governments in various countries adopted strict prevention and control measures to avoid the further spread of the virus and to reduce the probability of new patients being infected. Because of the stagnation of most production activities in many countries, the vast majority of ordinary people have been isolated at home. Meanwhile, fake information and rumors have loomed large online, which caused panic and even racial discrimination and hate in some countries. Those negative emotions have led to irrational decisions made by governments, enterprises, and investors for the prevention and control of the epidemic without accurate and comprehensive information, posing inestimable risks to the world's economy, politics, and finance.

The Covid-19 breakout challenged all areas of economics including, but not only, health, industrial organization, macroeconomics, finance, history, development, inequality, political economy and public finance, and concerns theory as well as empirical evidence. This Special Issue aims to provide a forum for scholars to share economic, political, and financial insights on the COVID-19 outbreak. Submissions in all these areas were welcomed until November 2020.

We welcome submissions that address issues related to (but not limited) to the following topics:

- The economic aftermath of COVID-19
- Economics measures for the post-COVID period
- COVID-19 and financial markets
- The response of emerging stock markets to the COVID-19 pandemic
- Government reactions to COVID-19 across the globe
- COVID-19 management
- Sustainability practices during the COVID-19
- COVID-19 and its environmental effects
- COVID-19 and public finance
- The reaction to economic policy changes
- Socio-economic effects of the outbreak
- The impact of the outbreak on oil prices
- COVID-19 and sustainable finance

### **SUBMISSION PROCEDURE:**

Authors can follow regular submission procedures described in the author guidelines pages. Interested authors are encouraged to contact the special issue editors before making a formal submission to the journal's submission portal to discuss the suitability of their papers for the special issue and their submission timeline.

When submitting, select the following in the article type selection drop-down menu to correctly direct submitted papers to the special issue editors.

### VSI: Economic, Political and Financial Impacts of the COVID-19 Outbreak

The special issue submission channel is open now and will close on November 20, 2020.

All the principles, rules and processes applied by the journal, such as the journal's review process and acception conditions, publication policy, publication ethics standards, writing rules, are also valid for the papers to be submitted to the special issue.
