Author Contribution Statement

In multi-authored manuscripts submitted for publication, it is extremely important to indicate the contribution levels and contribution areas of the authors in terms of transparency and compliance with ethical rules. The contributions of the authors are indicated on the table below.

	Author name and contribution rate (%)	Author name and contribution rate (%)	Author name and contribution rate (%)	Author name and contribution rate (%)	....
1. Idea/Concept, Method and Design (Research idea, research question, assumptions and hypotheses)					
2. Literature review (Literature review on the research problem and its evaluation in the context of the research topic)					
3. Data Collection and Analysis (Planning and execution of the data collection process, data analysis and interpretation)					
4. Writing and Editing (Writing and revisions of the article)					
5. Critical Review (Evaluating the work before submission not only in terms of spelling and grammar, but also in terms of intellectual content specific to the field)					
6. Research Infrastructure Support and Financial Support (Provision and managing to research facilities, permits and financial support for the project)					
7. Publication Process (Managing the publication process of the article)

Declaration on the Use of Artificial Intelligence (AI) Programs

The Statement on Use of Artificial Intelligence (AI) is intended to ensure transparency and does not in any way excuse or mitigate the responsibility of the author(s) for any consequences that may arise in the work, such as material errors, bias, breach of data privacy, unfair or improper use. All responsibility belongs to the authors within the framework specified in the Author Contribution Table.

In line with COPE's position statement on AI tools https://publicationethics.org/guidance/cope-position/authorship-and-ai-tools?ct=t(member-insight-ai-feb-2023, Large Language Models (LLMs) are not to be credited as authors due to their inability to independently conceptualize research design or assume responsibility for the integrity, originality, and validity of the published work. Authors are required to describe any content generated or modified by AI tools explicitly, and to appropriately cite the tool's name, version, as well as any external sources that the AI may have utilized. This guidance excludes standard tools aimed at enhancing spelling and grammar. The final determination of whether the use of AI tools is permissible rests with the Editor and Publisher.

In this research, artificial intelligence was used in the following sections and ratios:

Reason to Use Artificial Intelligence	Used Artificial Intelligence Programme	Rate of using artificial intelligence (%)			
		<10	11-20	21-35	>35
1. Idea/Concept, Method and Design (Research idea, research question, assumptions and hypotheses)					
2. Literature Research (Literature review on the research problem and its evaluation in the context of the research topic)					
3. Data Collection and Analysis (Planning and execution of the data collection process, data analysis and interpretation)					
4. Formation of the text (writing and revisions of the article)					
5. Translation into English (Translation into English of the text submitted for publication, including Abstract, Extended English Abstract)					
6. Translation from Foreign Languages (Translation from foreign language materials used in the formation of the text)					
7. Abstracting from Written Sources Used in Article Writing					
Other (please specify):
